Cloudflare CDN Cache

PrestaShop module

Compatibility

PrestaShop 1.7-8.x

Goal

Allows you to use Cloudflare services in your store. You can adjust Cloudflare settings directly in PrestaShop admin panel.

Benefits for Merchants

- improves website performance;
- enhances website security;
- improves uptime and availability;
- simplifies website management.

Benefits for customers

- higher website performance;
- improves website security;
- reduces data usage;
- improves website reliability;
- protection against online threats.

Features

- possibility to manage your website by connecting your Cloudflare account ;
- admin can change Cloudflare settings in PrestaShop back office;
- admin can purge or preload cache of their website;

Module settings

1. Copy the **Global API key**, **Zone ID** of your website, **your account email** and paste them into the corresponding fields on the configuration page of the module for using features of the module:
