

Distribute your store products on WordPress sites

Compatibility

PrestaShop 1.7.x – 8.x

Goal

Distribute your store products on WordPress sites! By easily adding products to WordPress, you can achieve higher sales, inventory expansion & customer experience. WP visitors will “add to cart” with the final proceeding of the order in PrestaShop.

Opportunities

Module allows a PrestaShop store owner to copy - paste products with appropriate categories and reflect them on any WordPress site in just by inserting simple code to the page or post body!

Admin opportunities

- Admin can generate the appropriate styles code snippet in PrestaShop module settings and copy-paste it to any WordPress post/page.
- Admin will distribute his PrestaShop products among WordPress satellites, which will boost his sales.
- This instrument could cool solution for dropshipping!

Features

- Admin can generate the appropriate styles code snippet in PrestaShop module settings and copy-paste it to any WordPress post/page.
- Therefore WordPress visitors will see the same product with prices, categories, descriptions and images as they are in PrestaShop.
- WordPress visitors will be allowed to click on the “Add to Cart” button. Then they will be redirected to PrestaShop cart page or product page (defined by admin).
- Admin can generate different styles of the snippet look, language of the products interface, which will be shown in WordPress

Benefits for customers

Customers will have more options to find the product throughout the web, because Wordpress satellites will spread the same products as the main PrestaShop store has. More offers with goods on the market - more chances to buy them!

Settings

Module configuration page (Script settings)

- Text in popup, which will be shown before the redirect from WordPress to main site (PrestaShop)
- Redirect options to PrestaShop (same tab / new tab / cart page / product page / product card to product page)
- Define currency, which will be shown in WordPress
- Choose categories and appropriate products, which will be shown in WordPress
- Styles settings (show / hide category block, show / hide search block, show / hide breadcrumbs, price font color and hover color, show / hide sale price, rest of visual styles for products and categories)
- Language of the products interface, which will be shown in WordPress
- Currency, which will be shown in WordPress
- Categories and appropriate products, which will be shown in WordPress

The screenshot shows the PrestaShop 1.7.8.2 administration interface. The top navigation bar includes the PrestaShop logo, version number, a search bar, and links for 'View my shop', notifications, and user profile. The left sidebar contains a menu with categories: Dashboard, SELL (Orders, Catalog, Customers, Customer Service, Stats), IMPROVE (Modules, Design, Shipping, Payment, International, Marketing), and CONFIGURE (Shop Parameters, Advanced Parameters). The main content area is titled 'Configure' for the 'Copy - Paste to WordPress' module, with sub-navigation for 'Modules / copypaste / Configure'. Action buttons for 'Back', 'Translate', 'Check update', and 'Manage hooks' are visible. The 'Script Settings' section includes a text input field for a popup message (with 'Example message' as a placeholder) and a checkbox for 'Display popup'. The 'Redirect option' section features five radio button options: 'Open site in same tab' (selected), 'Open site on new tab', 'Redirect to cart page', 'Redirect to product page', and 'Product card to product page'. The 'Style setting' section contains two columns of radio button options: 'Show category block' (selected), 'Hide category block', 'Show search block' (selected), 'Hide search block', 'Show breadcrumbs' (selected), 'Hide breadcrumbs', 'Price text color' (with a color picker set to #ff571a), and 'Price text color (hover)' (with a color picker set to #007c14).
