Compatibility

PrestaShop 1.7.6 - 8.2.1

Goal

Versatile suite of tools and instruments for extending both Front Office and Back Office functionalities, improving user experience and expanding admin options with powerful management opportunities

Benefits for Merchants

- Multi-tool is an "all-in-one" set that contains tools that will help solve a wide variety of tasks and boost your PrestaShop store's performance! It's like a Swiss army knife for the Prestashop admin – must have!
- With each subsequent version release of the "Multi-tool" module, **the number of tools will increase** and you'll be allowed to enable some and disable others inside the module, just like in a real multi-tool.
- You don't have to pay anything extra you'll always get new tools inside with every module update for free!
- Unlock the full potential of your PrestaShop store with the "Multi-tool" module. Streamline your operations, enhance your customer experience, and drive your sales to new heights.
- Save time and effort with a suite of tools designed to make your administrative tasks more efficient & improve your store's usability and attractiveness, leading to higher customer satisfaction and repeat purchases.

Benefits for customers

- Customers will appreciate the quality of your store, the accuracy and relevance of the data in it (products management, etc), the speed of loading the site and many additional functions that are simply absent in competing stores!
- "Multi-tool" is a combiner of possibilities that you can connect or disconnect from the number of available tools. Stay ahead of the competition with cutting-edge features that keep your store modern and efficient!

Features

- "Multi-tool" is a universal set of tools that you can enable or disable as needed. For example, you can activate only "Add to cart redirect" tool and others will remain disabled. Tomorrow you will need the "Products cleaner" tool no problem, you just activate it in the module and use for free! You can activate all the tools and use them all at the same time you do NOT pay anything extra!
- To enable any tool, you do not need to download anything or log in just click on the "Activate" button in the list of available module tools. All of them are immediately in the "Multi-tool" module and can be accessed at any time.
- With each new release of the "Multi-tool" module, more and more tools will appear in it. All of them are free! You only need to purchase the module once and receive updates forever.

Installation:

- Upload the module through the Backoffice (Modules > Upload a module)
- Hit Install it and enter the configuration
- Install the necessary tool

Custom Product Labels

Tool

Creates and displays custom labels and stickers on product images so they will become more visible and attractive for buyers. Label can show different information (discounts, novelty, popularity, sales, etc.).

Benefits for Merchants

- informative admin-page with a list of all created labels and the ability to filter and quickly disable or delete them
- creation of an unlimited number of labels with individual settings
- 4 conditions of labels displaying:
 - 1. Special offer for all discounted products
 - 2. New products for new products
 - 3. Best sellers sales leaders
 - 4. Manual products manual selection of the desired product
- disable the display of standard PrestaShop stickers
- separate settings for each language:
 - 1. ability to disable display for a specific language
 - 2. icon type (no icon / choose from the standard ones / upload your own image / Font Awesome icon more than 700 pieces)
 - 3. add any text
 - 4. choose a position (in any corner or in center)
 - 5. customize your styles

Benefits for customers

- attractive products presentation with actual labels of sales and much more;
- visual filtering of products by labels/stickers with discounts and much more;
- feeling of vivid and live store with individual approach

Features

- admin can design any custom styles labels / sticker;
- any location, fonts, sizes
- Font Awesome icons
- custom images upload
- flexible language settings

Border radius – radius of block corners in px

Padding – internal space between label content and its border in px

Margin - external distance from the labels to the borders of the product image itself in px

Affiliate Program with Referrals & Promotional Links (URLs)

Tool

Increases your store sales via extra traffic from affiliate links placed by referrals anywhere: social networks or sites! Each your referral will be able to generate unique URLs to categories or pages and control the statistics of conversion and sales

Benefits for Merchants

- increase in product sales thanks to referrals
- expanding the store's audience and traffic
- distribution of products through affiliate links in social networks and websites
- additional trust in the store products referrals have authority and reputation in their audiences
- easy tracking of referral link statistics (each link has a unique code in URL)
- panel for management of referrals and their affiliate links
- ability to append the selected product or categories to each unique affiliate link
- control of conversions and orders through the affiliate links
- flexible settings of campaigns and referral programs
- the ability to set a commission percentage for an affiliate link
- view the balance of each referral program partner
- control the withdrawal of funds for partners

Benefits for customers

- more entry points to the online store (traffic from social networks with affiliate links, etc.)
- customers can follow the **affiliate link** with the desired product or category easily and directly without an extra search
- referrals can monitor the conversion and orders on their affiliate links directly in the user's account
- referrals can see data related to the orders created via their affiliate links (date, amount and list of products)
- **unique referral code** in each unique affiliate link for accurate control
- the ability to monitor your own balance
- the ability to create requests to withdraw funds from your account

Features

- multilingual compatibility
- creation of marketing campaigns for referrals
- affiliate links generation with a unique referral code attached to the campaign
- control of conversions and orders after following the affiliate link
- control of the order price for the **products selected while the affiliate link was generated** in the admin-panel (other products in order will be ignored)
- adding a description for the campaign or link
- attaching the referral (PrestaShop user) to the affiliate link so that he can see its statistics in userpanel
- view affiliate link statistics by both the referral and the customer
- separate products or categories appending to the affiliate link
- convenient affiliate link copying

The module adds two subsections in the marketing section:

- Affiliate Program page with a list of all affiliate links
- Affiliate Campaigns page with a list of all campaigns

Since affiliate link building is not possible without at least one campaign, the first thing to do is to create a campaign!

Creating a campaign

- click on Add New

A	ffiliate	Campaigns						Add new
	Affiliate Cai	mpaigns 0						
	ID	Name	Description	Number of links	Visits	Orders	Active	
				No records found				

To create a campaign, you only need to enter its name and, if desired, a description:

Marketing / Attiliate Campaigns Add new		Help
🖉 Campaign		
* Name	Please enter the name	
Description		
Enabled	Yes	
Cancel		Save

Campaign creation fields:

- Name the name of the campaign
- **Description** description of the campaign
- Enabled campaign status, Yes / No

After that, you can create an affiliate link.

Marketing / Affiliate Campaigns

Products Cleaner

Tool

Clears your store from out-of-date products, quantity of which is equal to zero in the stock and which were sold more than the defined period of time. You can specify an "after sale period" and run store cleanup manually or regularly using cron.

Opportunities

- **Regular products cleaning** - the module is configured by the user for automatic regular (periodic) removals of goods from the store, the amount of which is zero in the stock during a certain period. It's done by cron with the appropriate module link use;

- **One-time products cleaning** - the user can manually remove products from the site, the number of which is zero in the stock during a certain period;

- Redirect - the user can set an URL to which the redirect from the page of deleted product will trigger.

Settings

One-time products cleaning

• select the period after sale in **ONE-TIME PRODUCTS CLEANING** panel:

Period after sale:	12	Days	•
	🛍 Clean products now	•	

- click on **Clean products now** button the products cleaning process will be proceed according to the defined period after sale. "After sale" means a period, during which the product quantity was = 0 in the stock and naturally there were no orders of this product during the defined "after sale" period.
- number of the deleted products will be shown while the cleaning has been finished:

Regular products cleaning

• select the period after sale in **REGULAR PRODUCTS CLEANING BY CRON** panel:

SREGULAR PRODUCTS CLEANING BY CRON			
Period after sale:	3	Months	v
Cron url:	http://focus.softsprint.pg	Hours Days Months	ctscleaner/cron?token=BpCFdD1IYwki
	Save cron settings	Years	

- save the selected period after this click on Save cron settings button;
- add the link **Cron url** into the cron settings of your server:

Redirect

The "**Redirect URL**" field allows to set the URL to which the redirect from the page of deleted products will trigger. Enter the link in the **Redirect URL** input and save the changes (click the **Save Settings** button).

¢₿ SETTINGS		
Redirect URL	your link	de 🕶
	If product not found, customer will redirect on this url	
	Save Settings	

Explanations of the fields in the status block (typical for both: One-time products cleaning and Regular products cleaning):

Period after sale:	12		Days	•	
	🛍 Clean p	oroducts now	1		
	Pr N D Tr R C	rocess assign ow date: 201 ate for check otal products emoved proc omplete.	ting the produ 8-03-08 05:11 ting: 2018-02- t: 0 ducts: 0	ucts to the cate 1:45 24 05:11:45	gories was done:

- **Now date** current data and the time of the report
- Date for checking displays the date from which the system has checked the goods and selected those which number was zero from that date
- Total products quantity of the found products
- **Removed products** quantity of the deleted products

Important

- Conditions of the product deleting:
 - stock balance of the product (quantity) = 0;
 - \circ ~ there were no product orders in the Orders section during the selected period.
- All product data will be erased while deleting it (database meanings, images, combinations, attributes, characteristics, etc.)
- Orders history of the particular product will remain
- If one item from the product combinations (in the "combinations" section) is zero and the other combination items are available, this zero-item will NOT be deleted. The module does NOT remove combinations, but goods.

Add To Cart Redirect

Tool

Adds a redirect link to the "Add to cart" button on the product page, so the store visitor will be redirected to the appropriate URL instead of the native PrestaShop checkout process. Store admin can set individual links per each product.

Benefits for Merchants

- Merchant (store owner) is allowed to control flexible sales management by setting the redirects for the necessary products: some products will stay available to be purchased from his regular store (native PrestaShop behaviour), but some products will be redirected to any URLs, like Amazon, eBay or any other custom links. For example, there is no appropriate product in PrestaShop stock, but it's presented in Amazon, so admin sets the necessary Amazon link in the PrestaShop product settings. User will be redirected to Amazon by clicking on "Add to cart" button on PrestaShop product page – admin will not miss the client.
- Merchant (store owner) can have some another Shopify or WooCommerce store, so he can relink his main PrestaShop store with those other stores by redirecting customers to any pages he needs. It becomes some kind of multi-market.
- It's cool instrument to save sales if particular product is out of stock in your store, but it is presented somewhere in another store, so you could easily redirect your customers there!
- Merchant (store owner) can study the demands for a product in the market, by redirecting the visitors to some landing page with the extended product description, booking form, etc

Benefits for customers

- Customers will not stay without a product, which is out of stock, they will have a chance to be redirected to another store, where this product is presented;
- Customers will get some extra portion of information, which they should learn before the final product purchase, if this product is prototype and store owner just studies the demands for a product in the market

Features

- Store admin can add/edit/delete the redirect link to each product individually;
- Each product can have different link, where user will be redirected;
- Links could be internal (in measures of your domain) or external (Amazon, eBay, whatever you wish);

Module settings

1. Store admin can add/edit/delete the redirect link to each product individually:

Prestashop 1.7.8.5	Quick Access 👻	Q Search (e.g.: product reference, custon)

	×						

2. Store visitor will be redirected to the appropriate link (defined by admin) after clicking on "Add to cart" button. This link will be opened instead of the native PrestaShop checkout page:

Visitors statistics with fake users on product page

Tool

Adds a block with the number of users who are browsing the product page at the moment. You can add fake users to increase total visitors number. Block is located under the 'Add to cart' button.

Benefits for Merchants

- Merchant (store owner) can demonstrate potential customer an interest to the particular product by showing a number of visitors on the product page at that moment. This instrument can force customers to action to but the product. Visitors statistics could be especially efficient with the sales and discounts!
- Store owner can add fake views to cause real buyers to be interested in the product. It is possible to set the minimum and maximum value for fake views in BO. Module will select a random value from this range automatically and add this meaning to the real quantity of visitors on product page. You can also specify how often these values are refreshed.
- Store owner can disable fake views and display real users only.
- Store owner can customize style of the visitors block. Such parameters like "background" "color", "font color", "font size", "border radius", "padding", "margin" can be specified in module configurations.
- Store owner can hide the block without deleting it or turning off the module.

Benefits for customers

- Customers can see how many people are looking at this product now. This information allows them to determine the interest (hype) to product and motivates them to buy it;
- Visitors statistics could be especially helpful for customers in case of sales and discounts it allows them to understand and feel how advantageous the product suggestion is.

Features

- Store admin can enable/disable fake views;
- Customize the look of the block;
- Manage the refresh rate of fake views.

Settings

1. Store admin can enable/disable visitors statistics block (it will be hidden on the products page if disabled)

Custom popup Tool

Displays a popup on the site page (for example, to promote some product or to increase sales of some items). Popup is as a teaser advertisement, which forces the user to click on it and follow the appropriate link, which boosts your sales! Besides popup is the superb way to inform the visitors about some activity, sales, promocodes, etc. All of this allows to transform the site into interactive instrument!

Module fields settings:

- PopUp image - here you can upload a custom image (popup) in .jpg, .png;

EDIT	
PopUp image	
	CUSTOM POPUP Internet

Repeat	YES NO
	The popup will display again
Active	YES NO
Cancel	Save

Important!

- images for **PopUp image** can be uploaded in the following formats: .jpg, .png;
- if no URL is specified in the **Link** field, no link will be opened when clicking on popup. Popup will be a static image;
- if you do not select "YES" in the Active field, the popup will not be displayed;
- if a user clicks on the popup and follows the link, the popup will not appear on that user's site anymore;
- **REPEAT** here can be set the popup reappearance function on the page in case the user closes the popup with the help of "X" button. Popup will stop to appear if user clicked on the popup image and followed the appropriate link.

Distribute your store products on WordPress sites

Tool

Distribute your store products on WordPress sites! By easily adding products to WordPress, you can achieve higher sales, inventory expansion & customer experience. WP visitors will "add to cart" with the final proceeding of the order in PrestaShop.

Opportunities

Module allows a PrestaShop store owner to copy - paste products with appropriate categories and reflect them on any WordPress site in just by inserting simple code to the page or post body!

Admin opportunities

- Admin can generate the appropriate styles code snippet in PrestaShop module settings and copypaste it to any WordPress post/page.
- Admin will distribute his PrestaShop products among WordPress satellites, which will boost his sales.
- This instrument could cool solution for dropshipping!

Features

- Admin can generate the appropriate styles code snippet in PrestaShop module settings and copypaste it to any WordPress post/page.
- Therefore WordPress visitors will see the same product with prices, categories, descriptions and images as they are in PrestaShop.
- WordPress visitors will be allowed to click on the "Add to Cart" button. Then they will be redirected to PrestaShop cart page or product page (defined by admin).
- Admin can generate different styles of the snippet look, language of the products interface, which will be shown in WordPress

Benefits for customers

Customers will have more options to find the product throughout the web, because Wordpress satellites will spread the same products as the main PrestaShop store has. More offers with goods on the market - more chances to buy them!

Settings

Module configuration page (Script settings)

- Text in popup, which will be shown before the redirect from WordPress to main site (PrestaShop)
- Redirect options to PrestaShop (same tab / new tab / cart page / product page / product card to product page)
- Define currency, which will be shown in WordPress
- Choose categories and appropriate products, which will be shown in WordPress
- Styles settings (show / hide category block, show / hide search block, show / hide breadcrumbs, price font color and hover color, show / hide sale price, rest of visual styles for products and categories)
- Language of the products interface, which will be shown in WordPress
- Currency, which will be shown in WordPress
- Categories and appropriate products, which will be shown in WordPress

Next stage is to copy – paste the shown above code snippet to WordPress page or post. It will provide next look of the products and categories according to the initially defined styles and settings in module:

Spell checker using Grammarly API

Tool

Improves the quality of text content on a store by checking it for grammatical and spelling errors. By using this module, users can get suggestions for corrections and improvements to their writing, which can help to enhance the readability and professionalism of their Prestashop. Additionally, since search engines tend to favor well-written content, using Grammarly can also potentially improve a website's search engine optimization (SEO)

Benefits for Merchants

- **Improving the quality of content**: the module helps merchants to create high-quality and error-free content. This can be especially useful for writing product descriptions, promotional content, and other types of text that are important for attracting customers and conveying information.
- **Saving time:** by using Grammarly module, merchants can save time by catching errors and improving their writing more quickly. This can be especially helpful for merchants who have a lot of content to write and want to be efficient with their time.
- Enhancing professionalism: error-free and high-quality writing can enhance the overall professionalism of a merchant's brand. This can help to build trust with customers and increase the perceived value of a merchant's products and services.
- **Ease of use:** The module integrates with Prestashop's back office, making it easy for merchants to access and use Grammarly without having to switch between different applications or platforms.

Benefits for customers

- Customers can more easily understand the features and benefits of the products they are interested in
- Customers may be more likely to trust the website and the products being sold

Features

- Grammar and spelling checks
- Writing style analysis
- Plagiarism checker
- Vocabulary enhancement
- Sentence structure analysis
- Tone detection

Social login via Facebook API

Tool

Allows you to login and authorise in PrestaShop using Facebook account. Besides you can connect your Facebook account to the existing account in PrestaShop.

Benefits for Merchants

- simplifies users' registration on your site;
- increases the conversion of registrations on the site;
- popularize and promote your store in Facebook due to the ease of authorisation;
- users' base growth due to the simplicity of registration;
- higher conversion of orders due to the fast creation of the account on the site via Facebook.

Benefits for customers

- no need to enter personal data and passwords;
- fast orders proceeding no need to spend time for the new account creation;
- no necessity to remember login and password to the store account Facebook authentication is as easy as possible and secure;
 - registration and authorization are done in two clicks.

Features

- opportunity to create the new store account based on Facebook authentication;
- user can edit profile anytime (add the email there and rest of details);
- it's possible to connect Facebook authentication to any existing store account;
- user can unlink his Facebook from the store account.

Setup Facebook App by PrestaShop store admin

1. Navigate to https://developers.facebook.com, login to your Facebook account if you are not already logged in. Click **My Apps** in the top-right corner.

Social login via Instagram API

Tool

Allows you to login and authorise in PrestaShop using Instagram account. Besides you can connect your Instagram account to the existing account in PrestaShop.

Benefits for Merchants

- simplifies users' registration on your site;
- increases the conversion of registrations on the site;
- popularize and promote your store in Instagram due to the ease of authorisation;
- users' base growth due to the simplicity of registration;
- higher conversion of orders due to the fast creation of the account on the site via Instagram.

Benefits for customers

- no need to enter personal data and passwords;
- fast orders proceeding no need to spend time for the new account creation;

- no necessity to remember login and password to the store account – Instagram authentication is as easy as possible and secure;

- registration and authorization are done in two clicks.

Features

- opportunity to create the new store account based on Instagram authentication;
- user can edit profile anytime (add the email there and rest of details);
- it's possible to connect Instagram authentication to any existing store account;
- user can unlink his Instagram from the store account.

Setup Instagram App by PrestaShop store admin

11. Navigate to https://developers.facebook.com/products/instagram/, login to your Facebook account if you are not already logged in. Click **My Apps** in the top-right corner.

33. In the option **Tell us how you're using this permission or feature**, you can specify exactly the following: **This app integrates the Instagram icon at the user-profile page of our website which allows end-user to connect their Instagram profile with their pre-existing user-account. Note:** As Instagram does not allow login/authentication to be used with any of their scopes according to their developer docs, you can describe the mechanism your website uses Instagram icon in Social Account Linking section at the user profile page to allow your users to link their Instagram accounts to their existing accounts at your website. Just keep social login icons disabled at the login, register pages of your website before Instagram approves your submission.

Upload a screenshot showing the same, agree to the data usage policy and save changes.

Is to read fields in an instagram user profile, for example user ID and account type. You can use this permission to read the User node, which represents the instagram user, and the node's edges. 4. When the user unlinked his Instagram account:

- if the user logs in again using Instagram, the connection of Instagram to the existing customer account will be restored.

- if the user created a new customer account using the standard method and linked his Instagram account to it, the previous customer's account will be deleted in case there was not indicated email in it. In case the previous account has an email, it will remain active in PrestaShop, so there will be 2 accounts in total: previous without Instagram connection and the new one with the Instagram connection.

5. When deleting a customer account:

- in case the customer's account is deleted from Prestoshop, the connection to Instagram account of this customer will be deleted from the database.

6. When changing the module settings on the configuration page in the admin panel:

- if **Instagram App ID** or **Instagram App Secret** is changed to other values, all bindings of customers' accounts to Instagram that were made earlier will be lost.

- if **Instagram App ID** or **Instagram App Secret** is entered incorrectly or the Instagram application is not configured properly, then when trying to authenticate through Instagram, the user will be redirected to the Instagram page where he will see an error:

Passwordless login with Google Passkeys

Tool

Passkeys by Google are a safer and easier alternative to passwords. **Users** and **Admins** can log in with a **biometric sensor** (such as a fingerprint or facial recognition), **PIN**, or pattern, freeing them from having to remember and manage passwords.

Benefits for Merchants

- Passkeys by Google security and reliability
- You do NOT need any Google accounts
- **Biometric** sensor (such as a **fingerprint** and **facial** recognition) or **PIN** code **login** without entering a password every time
- Works for Android, iOS, Windows and any other devices with a Biometric sensor or PIN
- Most modern devices (smartphones, tablets and laptops) support
- Increased site usability simplified authorization allows your customers to log in quickly and easily
- Eliminates the problem that your customers forget their login or password they will be able to log in using the device authorization method
- Admin and store managers can also easily log in to the admin panel

Benefits for customers

- Eliminates one of the biggest problems for users using a login and password every time
- Users should not remember their login and password anymore
- Makes the account authorization quick and easy

Features

- Creating a Google Passkey for login both for admin and customers
- Authorization using Google Passkey
- Biometric sensor (such as a fingerprint and facial recognition) or PIN code login
- Authorization using a Passkey on the backend for admins and managers

1. Creating a Paykey by user (customer)

The first step is to create a new account or log in to an existing one by entering a login and password:

Contact us			English 🔻	은 Sign in	📜 Cart (0)
my store	my store CLOTHES ACCESSORIES ART			Starch our ca	talog
Home / Log in to y	our account				
Log in to you	r account				
	Email	example@mail.com		;	
	Password	SH	IOW		
		Forgot your password?			
		SIGN IN	-		

Open the user's account and click the "Create a passkey" button:

MAC OS example:

Ping services Tool

Improves indexing of your shop by notifying popular ping services about the new products and pages in your store. Speeds up store indexing and improves SEO.

Benefits for Merchants

- ping services speed up site indexing and promote it higher in search results;
- new pages and products will get traffic higher; -
- no need to use manual submissions in each individual ping service module sends bulk pings;
- store gets automatic fast backlinks indexing by search engine bots. -

Benefits for customers

- customers can find shop content more often in search results;
- customers can find shop and its products easier due to faster indexing by search engines; _
- backlinks from ping services will provide extra promotion of the store pages and products. _

Features

- admin can use any ping services he wants by adding their list in module settings; -
- admin can notify ping services by selecting necessary products or categories using checkboxes or directly from the product or category page while editing it;
- module sends pings automatically after admin adds content.

Module settings

1. "Configuration" tab

Shipments and returns					
Your pack shipment					
	Packages are generally dispatched within 2 days after receipt of payment and are shipped via UPS with tracking and drop- off without signature. If you prefer delivery by UPS Extra with required signature, an additional cost will be applied, so please contact us before choosing this method. Whichever shipment choice you make, we will provide you with a link to track your package online.				
	Shipping fees include handling and packing fees as well as postage costs. Handling fees are fixed, whereas transport fees vary according to total weight of the shipment. We advise you to group your items in one order. We cannot group two distinct orders placed separately, and shipping fees will apply to each of them. Your package will be dispatched at your own risk, but special care is taken to protect fragile nbjects.				
	Boxes are amply sized and your items are well-protected.
