

Multi-tool

Prestashop module
v. 1.0.2 / 9.0.0

List of included tools	Page
• Custom product Labels	3
• Affiliate Program with Referrals & Promotional Links (URLs)	7
• Products Cleaner	19
• Add To Cart Redirect	22
• Visitors statistics with fake users on product page	25
• Custom popup	30
• Distribute your store products on WordPress sites	34
• Spell checker using Grammarly API	38
• Social login via Facebook API	44
• Social login via Instagram API	56
• Passwordless login with Google Passkeys	79
• Ping services	87

Compatibility

PrestaShop 1.7.6 – 9.x

Goal

Versatile suite of tools and instruments for extending both Front Office and Back Office functionalities, improving user experience and expanding admin options with powerful management opportunities

Benefits for Merchants

- Multi-tool is an **“all-in-one” set** that contains tools that will help solve a wide variety of tasks and boost your PrestaShop store's performance! It's like a **Swiss army knife for the Prestashop admin** – must have!
- With each subsequent version release of the “Multi-tool” module, **the number of tools will increase** and you'll be allowed to enable some and disable others inside the module, just like in a real multi-tool.
- **You don't have to pay anything extra** - you'll always **get new tools inside** with every module update **for free!**
- **Unlock the full potential of your PrestaShop store** with the “Multi-tool” module. Streamline your operations, enhance your customer experience, and drive your sales to new heights.
- **Save time and effort with a suite of tools** designed to make your administrative tasks more efficient & improve your store's usability and attractiveness, leading to higher customer satisfaction and repeat purchases.

Benefits for customers

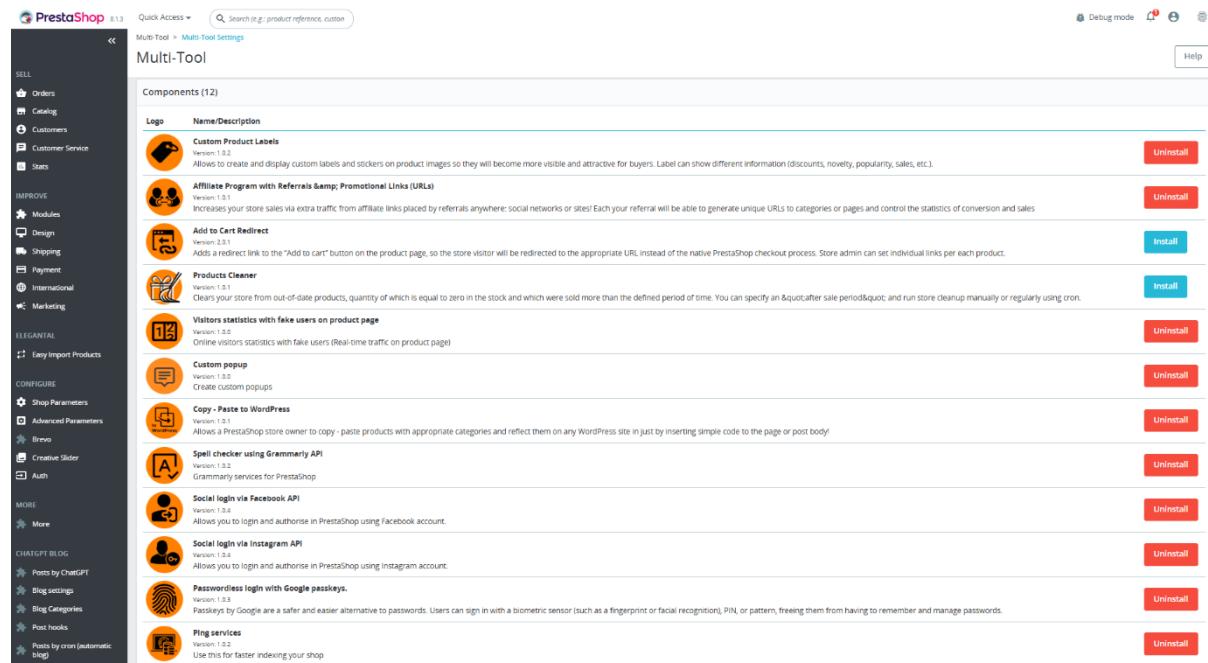

- Customers will appreciate the quality of your store, the accuracy and relevance of the data in it (products management, etc), the speed of loading the site and many additional functions that are simply absent in competing stores!
- “Multi-tool” is a combiner of possibilities that you can connect or disconnect from the number of available tools. Stay ahead of the competition with cutting-edge features that keep your store modern and efficient!

Features

- “Multi-tool” is a universal set of tools that you can enable or disable as needed. For example, you can activate only “**Add to cart redirect**” tool and others will remain disabled. Tomorrow you will need the “**Products cleaner**” tool - no problem, you just activate it in the module and use for free! You can activate all the tools and use them all at the same time - you do NOT pay anything extra!
- To enable any tool, you do not need to download anything or log in - just click on the “Activate” button in the list of available module tools. All of them are immediately in the “Multi-tool” module and can be accessed at any time.
- With each new release of the “Multi-tool” module, more and more tools will appear in it. All of them are free! You only need to purchase the module once and receive updates forever.

Installation:

- Upload the module through the Backoffice (Modules > Upload a module)
- Hit Install it and enter the configuration
- Install the necessary tool

The screenshot shows the PrestaShop Multi-Tool Settings page. The left sidebar contains navigation links for SELL, IMPROVE, ELEGANT, and MORE. The main content area is titled 'Multi-Tool' and shows a table of 'Components (12)'. Each component has a logo, name, description, and status buttons (Uninstall or Install). The components listed are:

Logo	Name/Description	Action
	Custom Product Labels Version 1.3.2 Allows to create and display custom labels and stickers on product images so they will become more visible and attractive for buyers. Label can show different information (discounts, novelty, popularity, sales, etc.)	Uninstall
	Affiliate Program with Referrals & Promotional Links (URLs) Version 1.0.1 Increases your store sales via extra traffic from affiliate links placed by referrals anywhere: social networks or sites! Each your referral will be able to generate unique URLs to categories or pages and control the statistics of conversion and sales.	Uninstall
	Add to Cart Redirect Version 2.0.1 Adds a redirect link to the “Add to cart” button on the product page, so the store visitor will be redirected to the appropriate URL instead of the native PrestaShop checkout process. Store admin can set individual links per each product.	Install
	Products Cleaner Version 1.5.1 Clears your store from out-of-date products, quantity of which is equal to zero in the stock and which were sold more than the defined period of time. You can specify an “after sale period” and run store cleanup manually or regularly using cron.	Install
	Visitors statistics with fake users on product page Version 1.0.5 Online visitors statistics with fake users (Real-time traffic on product page)	Uninstall
	Custom popup Version 1.0.2 Create custom popups	Uninstall
	Copy - Paste to WordPress Version 1.0.1 Allows a PrestaShop store owner to copy - paste products with appropriate categories and reflect them on any WordPress site in just by inserting simple code to the page or post body.	Uninstall
	Spell checker using Grammarly API Version 1.0.2 Grammarly services for PrestaShop	Uninstall
	Social login via Facebook API Version 1.0.4 Allows you to login and authorise in PrestaShop using Facebook account.	Uninstall
	Social login via Instagram API Version 1.0.4 Allows you to login and authorise in PrestaShop using Instagram account.	Uninstall
	Passwordless login with Google passkeys. Version 1.0.3 Passkeys by Google are a safer and easier alternative to passwords. Users can sign in with a biometric sensor (such as a fingerprint or facial recognition), PIN, or pattern, freeing them from having to remember and manage passwords.	Uninstall
	Ping service Version 1.5.2 Use this for faster indexing your shop	Uninstall

Custom Product Labels

Tool

Creates and displays custom labels and stickers on product images so they will become more visible and attractive for buyers. Label can show different information (discounts, novelty, popularity, sales, etc.).

Benefits for Merchants

- informative admin-page with a list of all created labels and the ability to filter and quickly disable or delete them
- creation of an unlimited number of labels with individual settings
- 4 conditions of labels displaying:
 - Special offer - for all discounted products
 - New products - for new products
 - Best sellers - sales leaders
 - Manual products - manual selection of the desired product
- disable the display of standard PrestaShop stickers
- separate settings for each language:
 - ability to disable display for a specific language
 - icon type (no icon / choose from the standard ones / upload your own image / Font Awesome icon - more than 700 pieces)
 - add any text
 - choose a position (in any corner or in center)
 - customize your styles

Benefits for customers

- attractive products presentation with actual labels of sales and much more;
- visual filtering of products by labels/stickers with discounts and much more;
- feeling of vivid and live store with individual approach

Features

- admin can design any custom styles labels / sticker;
- any location, fonts, sizes
- Font Awesome icons
- custom images upload
- flexible language settings

Settings:

The screenshot shows the 'Add new' label configuration page in the PrestaShop admin. The left sidebar shows the 'SELL' and 'IMPROVE' sections with various modules like Orders, Catalog, Customers, and Modules. The main area has a 'More / Product Labels' breadcrumb. The 'Add Label' form has the following fields:

- Status:** Enabled (checkbox)
- Label name:** Label Name
- Type:** Special offer (selected from a dropdown menu)
 - For this type of label your products are automatically chosen
 - New products
 - Best sellers
 - Manual products
- Flags:** Hide flags (checkbox) with a note: Do not display standard stickers PrestaShop (only if the product has a current label)

- **Status** - the status of the label: if disabled, it will not be displayed, but all settings will be saved
- **Label name** – label name for internal identification in the admin panel
- **Type** - the condition under which the sticker will be displayed (description of each below)
- **Hide flags** – hide or show standard PrestaShop stickers (will work only if the current label is displayed on the product)
- **Type “Special offer”** – no settings required, products will be selected automatically

Type “**New products**”:

* Status Enabled

* Label name

* Type

* Number days Number of days during which products are considered as "New"

Best sellers

Manual products

Hide flags Show Do not display standard stickers PrestaShop (only if the product has a current label)

Number days - number of days during which the products will be considered new (calculation is from the current day and minus the specified number of days)

Type “**Best sellers**”:

* Status Enabled

* Label name

* Type

* Number of sales Required number of product sales

Manual products

Hide flags Show Do not display standard stickers PrestaShop (only if the product has a current label)

Number of sales - required number of product sales to display the label (calculated for the entire period)

Type “**Manual products**”:

* Status  Enabled

* Label name

* Type

Search Product

 Hummingbird printed t-shirt [1]

Begin date  End date 

Search product - field for searching for a product with a drop-down list. Search is possible by name, link, category, manufacturer

Begin date - date from which the label will be displayed (if not set or equal to "0000-00-00", it will not be taken into account)

End date - end date after which the label will not be displayed (if not set or equal to "0000-00-00", it will not be taken into account)

Appearance settings:

Hide flags Show
Do not display standard stickers PrestaShop (only if the product has a current label)

*Configurations

Position

Preview (en) 

Configurations – selection of the language for which the appearance will be configured
Active - on or off label for the selected language

Type icon - select the type of icon to display:

- **No picture** - no icon
- **Standard icon** - choose from standard icons provided by the module
- **Font Awesome** - choosing the icon of the library of the same name
- **Image** - upload your image (supported formats are JPG, GIF, PNG)

Text label - enter any text for the label

Position – selection of where the label will be displayed on the photo:

- **Top - left** - in the upper left corner
- **Top - right** - in the upper right corner
- **Bottom - left** - in the lower left corner
- **Bottom - right** - in the lower right corner
- **Center** - in the center

Style settings:

Add styles On

Font color

Background color

Text size px

Border radius px

Padding px

Margin px

Add style - hide/show fields to customize your own styles

Font color - Font Awesome icon and text color

Background color – color of background

Text size - font awesome icon and text size in px

Border radius – radius of block corners in px

Padding – internal space between label content and its border in px

Margin - external distance from the labels to the borders of the product image itself in px

Affiliate Program with Referrals & Promotional Links (URLs)

Tool

Increases your store sales via extra traffic from affiliate links placed by referrals anywhere: social networks or sites! Each your referral will be able to generate unique URLs to categories or pages and control the statistics of conversion and sales

Benefits for Merchants

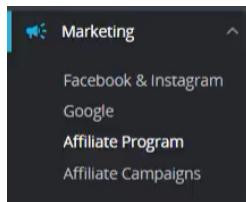

- increase in **product sales thanks to referrals**
- expanding the **store's audience and traffic**
- distribution of products through **affiliate links in social networks** and websites
- **additional trust** in the store products – referrals have authority and reputation in their audiences
- **easy tracking of referral link statistics (each link has a unique code in URL)**
- panel for **management of referrals** and their **affiliate links**
- ability to append **the selected product or categories** to each unique affiliate link
- **control of conversions and orders** through the affiliate links
- flexible settings of **campaigns and referral programs**
- the ability to set a commission percentage for an affiliate link
- view the balance of each referral program partner
- control the withdrawal of funds for partners

Benefits for customers

- **more entry points** to the online store (traffic from social networks with **affiliate links**, etc.)
- customers can follow the **affiliate link** with the desired product or category easily and directly without an extra search
- referrals can monitor the conversion and orders on their **affiliate links** directly in the user's account
- referrals can see **data related to the orders** created via their **affiliate links** (date, amount and list of products)
- **unique referral code** in each unique affiliate link for accurate control
- the ability to monitor your own balance
- the ability to create requests to withdraw funds from your account

Features

- **multilingual** compatibility
- creation of marketing **campaigns for referrals**
- **affiliate links** generation with a **unique referral code** attached to the campaign
- **control of conversions and orders** after following the affiliate link
- control of the order price for the **products selected while the affiliate link was generated** in the admin-panel (other products in order will be ignored)
- adding a **description for the campaign or link**
- attaching the referral (PrestaShop user) to the affiliate link so that **he can see its statistics** in user-panel
- view **affiliate link statistics** by both the referral and the customer
- separate products or categories appending to the affiliate link
- convenient **affiliate link** copying

The module adds two subsections in the marketing section:

- **Affiliate Program** – page with a list of all affiliate links
- **Affiliate Campaigns** – page with a list of all campaigns

🔗 <https://softsprint3.pp.ua/vopypresta178/en/al/ogzt3a> 

 Category  Art Framed poster and vector images, all you need to give personality to your walls or bring your creative projects to life.

In order to copy the link, you need to click on the **copy** icon

After clicking on the link, the user is redirected to the attached category (or product) and the number of visits will be updated in statistics:

The screenshot shows a web store interface. At the top, there is a navigation bar with 'my store' (in red), 'CLOTHES', 'ACCESSORIES', and 'ART'. A search bar on the right says 'Search our catalog'.

The main content area is titled 'ART' and contains the following text: 'Framed poster and vector images, all you need to give personality to your walls or bring your creative projects to life.' Below this, there is a sidebar titled 'FILTER BY' with the following options:

- Composition:** Matt paper (3)
- Availability:** Available (7) In stock (7)
- Brand:** Graphic Corner (6)
- Price:** €0.00 - €2.00
- Dimension:** (A horizontal slider bar)

The main content area shows a message: 'There are 7 products.' and a 'Sort by: Relevance' dropdown. Three framed poster products are displayed:

- The first poster has the text 'THE BEST IS YET TO COME'.
- The second poster has the text 'The Adventure BEGINS'.
- The third poster has the text 'TODAY IS A GOOD DAY'.

Below the products, there is a section for 'Category' with a sub-section for 'Art'. It includes a description: 'Framed poster and vector images, all you need to give personality to your walls or bring your creative projects to life.' and a 'Copy' link. To the right, there are statistics: 'Visits: 1' and 'Orders: 0'. A green checkmark indicates the category is 'Active'.

The screenshot shows an 'Order confirmation' page. At the top, it says 'Home / Order confirmation'.

The main message is: **✓ YOUR ORDER IS CONFIRMED**. It also states: 'An email has been sent to the example@gmail.com address.'

The 'ORDER ITEMS' table shows the following data:

ORDER ITEMS	UNIT PRICE	QUANTITY	TOTAL PRODUCTS
	€34.80	1	€34.80

The 'TOTAL' table shows the following summary:

Subtotal	€34.80
Shipping and handling	€8.40
TOTAL (TAX INCL.)	€43.20

ORDER DETAILS:

Description	<input type="text"/>				
Invoice	<input type="button" value="Delete"/> <input type="button" value="Add file"/> <input type="button" value="Download current file"/>				

In this form, the administrator has the opportunity to enter data about the transaction he made when transferring funds to the partner's account.

Field description:

- Invoice number – invoice number (document) certifying payment to the partner
- Status – operation status. There are three types:
 - o Approved – this means that the withdrawal of funds has taken place and the corresponding amount will be debited from the partner's balance
 - o Canceled – means that the withdrawal of funds did not take place for some reason or the admin received a request from the partner for the withdrawal of funds
 - o Requested by customer – the withdrawal request was created by a partner.
- Amount – the amount of funds that must be transferred to the partner's account
- Description – operation description

- Invoice – file, document certifying the fact of transferring funds

Products Cleaner

Tool

Clears your store from out-of-date products, quantity of which is equal to zero in the stock and which were sold more than the defined period of time. You can specify an "after sale period" and run store cleanup manually or regularly using cron.

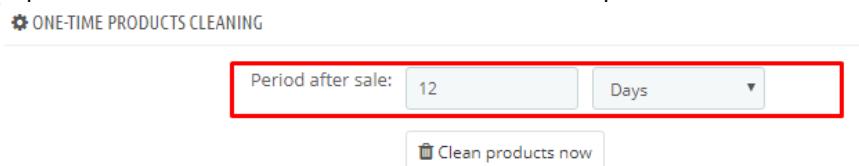

Opportunities

- **Regular products cleaning** - the module is configured by the user for automatic regular (periodic) removals of goods from the store, the amount of which is zero in the stock during a certain period. It's done by cron with the appropriate module link use;
- **One-time products cleaning** - the user can manually remove products from the site, the number of which is zero in the stock during a certain period;
- **Redirect** - the user can set an URL to which the redirect from the page of deleted product will trigger.

Settings

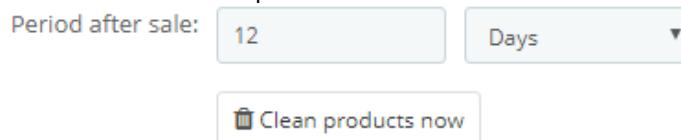

One-time products cleaning

- select the period after sale in **ONE-TIME PRODUCTS CLEANING** panel:

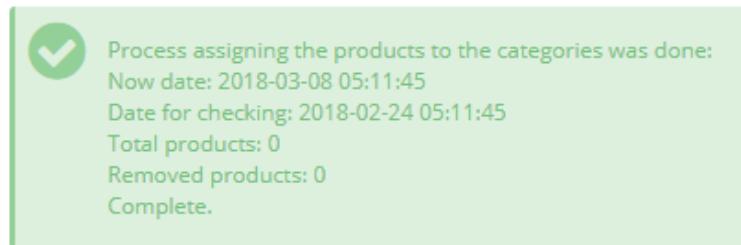

Period after sale: 12 Days

- click on **Clean products now** button – the products cleaning process will be proceed according to the defined period after sale. "After sale" means a period, during which the product quantity was = 0 in the stock and naturally there were no orders of this product during the defined "after sale" period.
- number of the deleted products will be shown while the cleaning has been finished:

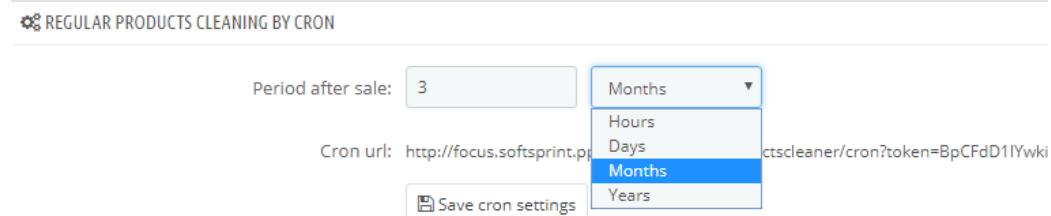

Period after sale: 12 Days

Process assigning the products to the categories was done:
Now date: 2018-03-08 05:11:45
Date for checking: 2018-02-24 05:11:45
Total products: 0
Removed products: 0
Complete.

Regular products cleaning

- select the period after sale in **REGULAR PRODUCTS CLEANING BY CRON** panel:

Period after sale: 3 Months

Cron url: <http://focus.softsprint.ru/ProductsCleaner/cron?token=BpCFdD1IYwki>

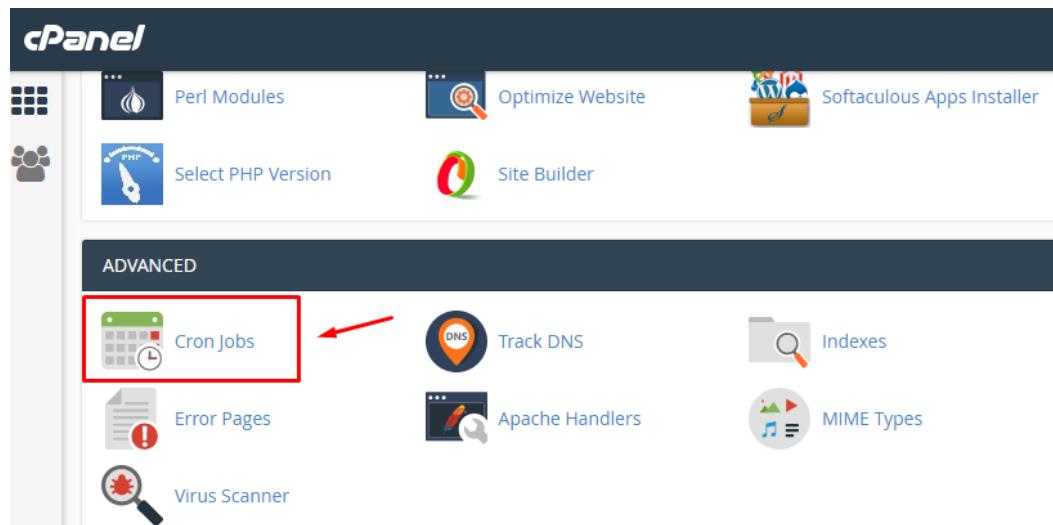

- save the selected period after this – click on **Save cron settings** button;

- add the link **Cron url** into the cron settings of your server:

REGULAR PRODUCTS CLEANING BY CRON

Period after sale: Months

Cron url: <http://my.shop.com/en/module/productscleaner/cron?token=BpCFdD1YwkisqR0wf4kerdpL8CWbi0>

Cron Jobs

Common Settings

Once Per Day(0 0 * * *)

Minute: 0 :00 (At the beginning of the hour.) (0)

Hour: 0 12:00 a.m. Midnight (0)

Day: * Every Day (*)

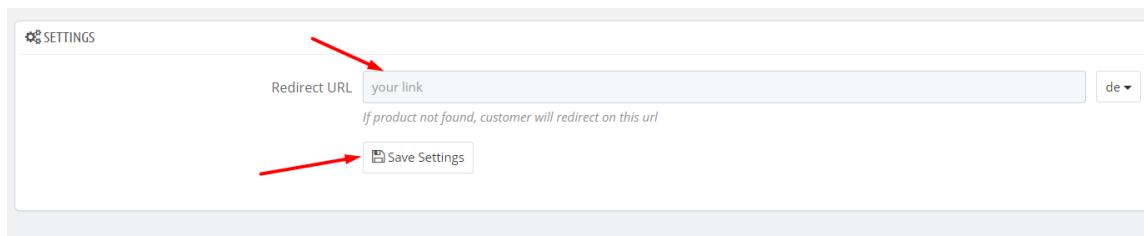

Month: * Every Month (*)

Weekday: * Every Day (*)

Command: wget -a --spider http://my.shop.com/module/productscleaner/cron?token=BpCFdD1Ywkisq

Redirect

The **"Redirect URL"** field allows to set the URL to which the redirect from the page of deleted products will trigger. Enter the link in the **Redirect URL** input and save the changes (click the **Save Settings** button).

Explanations of the fields in the status block (typical for both: One-time products cleaning and Regular products cleaning):

Period after sale:

Process assigning the products to the categories was done:
 Now date: 2018-03-08 05:11:45
 Date for checking: 2018-02-24 05:11:45
 Total products: 0
 Removed products: 0
 Complete.

- **Now date** – current date and the time of the report
- **Date for checking** – displays the date from which the system has checked the goods and selected those which number was zero from that date
- **Total products** – quantity of the found products
- **Removed products** – quantity of the deleted products

Important

- Conditions of the product deleting:
 - stock balance of the product (quantity) = 0;
 - there were no product orders in the Orders section during the selected period.
- All product data will be erased while deleting it (database meanings, images, combinations, attributes, characteristics, etc.)
- Orders history of the particular product will remain
- If one item from the product combinations (in the “combinations” section) is zero and the other combination items are available, this zero-item will NOT be deleted. The module does NOT remove combinations, but goods.

Add To Cart Redirect

Tool

Adds a redirect link to the “Add to cart” button on the product page, so the store visitor will be redirected to the appropriate URL instead of the native PrestaShop checkout process. Store admin can set individual links per each product.

Benefits for Merchants

- Merchant (store owner) is allowed to control flexible sales management by setting the redirects for the necessary products: some products will stay available to be purchased from his regular store (native PrestaShop behaviour), but some products will be redirected to any URLs, like Amazon, eBay or any other custom links. For example, there is no appropriate product in PrestaShop stock, but it's presented in Amazon, so admin sets the necessary Amazon link in the PrestaShop product settings. User will be redirected to Amazon by clicking on “Add to cart” button on PrestaShop product page – admin will not miss the client.
- Merchant (store owner) can have some another Shopify or WooCommerce store, so he can relink his main PrestaShop store with those other stores by redirecting customers to any pages he needs. It becomes some kind of multi-market.
- It's cool instrument to save sales if particular product is out of stock in your store, but it is presented somewhere in another store, so you could easily redirect your customers there!
- Merchant (store owner) can study the demands for a product in the market, by redirecting the visitors to some landing page with the extended product description, booking form, etc

Benefits for customers

- Customers will not stay without a product, which is out of stock, - they will have a chance to be redirected to another store, where this product is presented;
- Customers will get some extra portion of information, which they should learn before the final product purchase, if this product is prototype and store owner just studies the demands for a product in the market

Features

- Store admin can add/edit/delete the redirect link to each product individually;
- Each product can have different link, where user will be redirected;
- Links could be internal (in measures of your domain) or external (Amazon, eBay, whatever you wish);

Module settings

1. Store admin can add/edit/delete the redirect link to each product individually:

Products

<input type="checkbox"/>	9		Mountain fox cushion demo_15
<input type="checkbox"/>	8		Mug Today is a good day demo_13
<input type="checkbox"/>	7		Mug The adventure begins demo_12
<input type="checkbox"/>	6		Mug The best is yet to come demo_11
<input type="checkbox"/>	5		Today is a good day Framed poster demo_7
<input type="checkbox"/>	4		The adventure begins Framed poster demo_5
<input type="checkbox"/>	3		The best is yet to come' Framed poster demo_6
<input type="checkbox"/>	2		Hummingbird printed sweater demo_3
<input type="checkbox"/>	1		Hummingbird printed t-shirt demo_1

Follow the “Module” section inside of product settings:

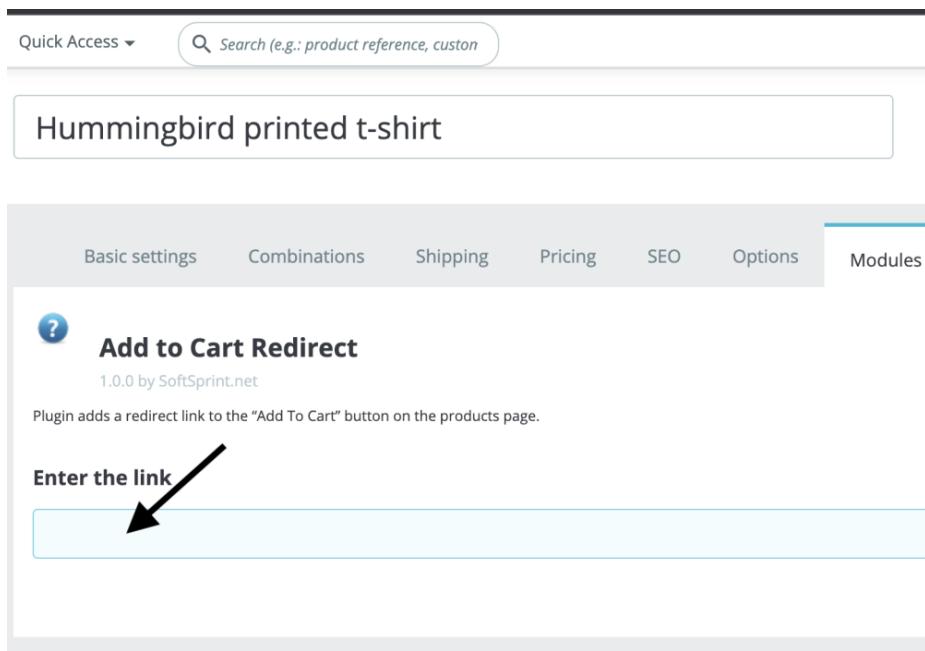

Hummingbird printed t-shirt

Basic settings Combinations Shipping Pricing SEO Options Modules

Summary

Regular fit, round neckline, short sleeves. Made of extra long staple pima cotton.

Here admin is allowed to set any URL he needs:

Visitors statistics with fake users on product page

Tool

Adds a block with the number of users who are browsing the product page at the moment. You can add fake users to increase total visitors number. Block is located under the 'Add to cart' button.

Benefits for Merchants

- Merchant (store owner) can demonstrate potential customer an interest to the particular product by showing a number of visitors on the product page at that moment. This instrument can force customers to action to buy the product. Visitors statistics could be especially efficient with the sales and discounts!
- Store owner can add fake views to cause real buyers to be interested in the product. It is possible to set the minimum and maximum value for fake views in BO. Module will select a random value from this range automatically and add this meaning to the real quantity of visitors on product page. You can also specify how often these values are refreshed.
- Store owner can disable fake views and display real users only.
- Store owner can customize style of the visitors block. Such parameters like "background" "color", "font color", "font size", "border radius", "padding", "margin" can be specified in module configurations.
- Store owner can hide the block without deleting it or turning off the module.

Benefits for customers

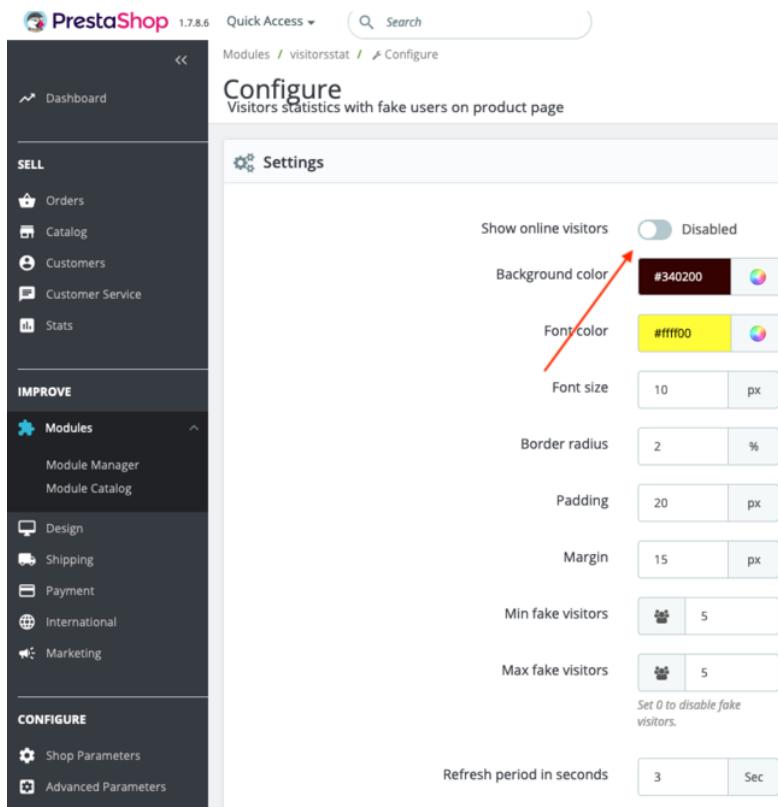

- Customers can see how many people are looking at this product now. This information allows them to determine the interest (hype) to product and motivates them to buy it;
- Visitors statistics could be especially helpful for customers in case of sales and discounts – it allows them to understand and feel how advantageous the product suggestion is.

Features

- Store admin can enable/disable fake views;
- Customize the look of the block;
- Manage the refresh rate of fake views.

Settings

1. Store admin can enable/disable visitors statistics block (it will be hidden on the products page if disabled)

Configure
Visitors statistics with fake users on product page

Settings

Show online visitors Disabled

Background color #340200

Font color #ffff00

Font size px

Border radius %

Padding px

Margin px

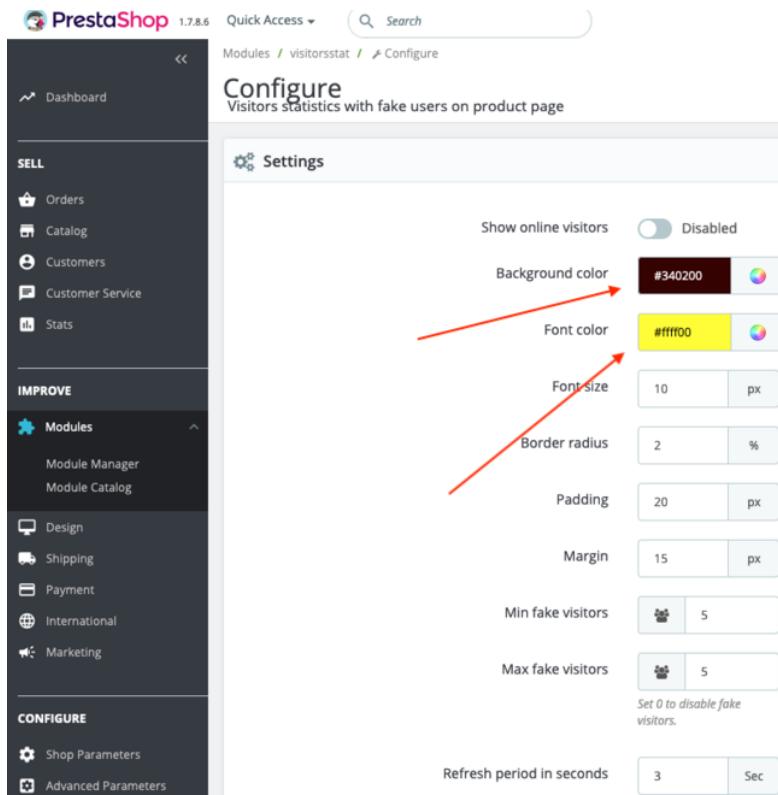

Min fake visitors 

Max fake visitors 

Set 0 to disable fake visitors.

Refresh period in seconds Sec

2. Adjust “Background color” and “Font color”:

Configure
Visitors statistics with fake users on product page

Security policy (edit with the Customer Reassurance module)
 Delivery policy (edit with the Customer Reassurance module)
 Return policy (edit with the Customer Reassurance module)

4. These settings allow you to specify the number of fake views:

The screenshot shows the PrestaShop 1.7.8.6 'Configure' page for the 'visitorsstat' module. The 'Settings' section contains the following configuration options:

- Show online visitors: Disabled (checkbox)
- Background color: #340200
- Font color: #ffff00
- Font size: 10 px
- Border radius: 2 %
- Padding: 20 px
- Margin: 15 px
- Min fake visitors: 5 (with a red arrow pointing to it)
- Max fake visitors: 5 (with a red arrow pointing to it)
- Refresh period in seconds: 3 Sec

A tooltip for the 'Max fake visitors' field states: "Set 0 to disable fake visitors."

You need to specify 0 in both fields to disable fake visitors (views).

The last field allows you to update the number of views on the product page dynamically after xx seconds. For example, new statistics meaning will be shown after each 3 seconds according to our settings, shown below:

Custom popup

Tool

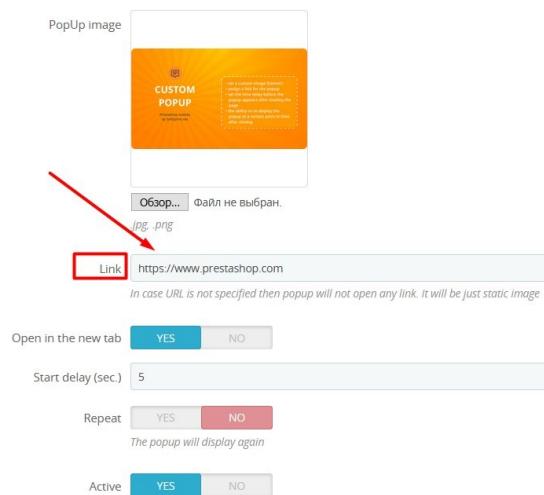

Displays a popup on the site page (for example, to promote some product or to increase sales of some items). Popup is as a teaser advertisement, which forces the user to click on it and follow the appropriate link, which boosts your sales! Besides popup is the superb way to inform the visitors about some activity, sales, promo-codes, etc. All of this allows to transform the site into interactive instrument!

Module fields settings:

- **PopUp image** - here you can upload a custom image (popup) in .jpg, .png;

- **Link** - this field permits to set a URL the link to the page which should be loaded when clicking on the popup;

- **Open in the new tab** - you can select "YES" if you want to open the link in the new window. You can select "NO" if you want to open the link in the same browser window

PopUp image

Link In case URL is not specified then popup will not open any link. It will be just static image

Open in the new tab

Start delay (sec.)

Repeat The popup will display again

Active

- **Start delay (sec.)** - this field allows to set the time interval before popup appears after loading the page (in seconds);

PopUp image

Link In case URL is not specified then popup will not open any link. It will be just static image

Open in the new tab

Start delay (sec.)

Repeat The popup will display again

Active

- **Repeat** - you can select "YES" if you would like to set the ability to re-display the popup in a certain time interval after closing the popup with the help of "X" button in the top right corner of popup;

PopUp image

Link In case URL is not specified then popup will not open any link. It will be just static image

Open in the new tab

Start delay (sec.)

Repeat The popup will display again

Active

- **Repeat delay (sec.)** - this field allows to set the time interval before the popup appears after the previous closing with the help of "X" button;

PopUp image

Обзор... Файл не выбран.
jpg, png

Link <https://www.prestashop.com>
In case URL is not specified then popup will not open any link. It will be just static image

Open in the new tab YES NO

Start delay (sec.) 5

Repeat YES NO
The popup will display again

Repeat delay (sec.) 3

Active YES NO

- **Active** - you can select "YES" and activate the popup.

PopUp image

Обзор... Файл не выбран.
jpg, png

Link <https://www.prestashop.com>
In case URL is not specified then popup will not open any link. It will be just static image

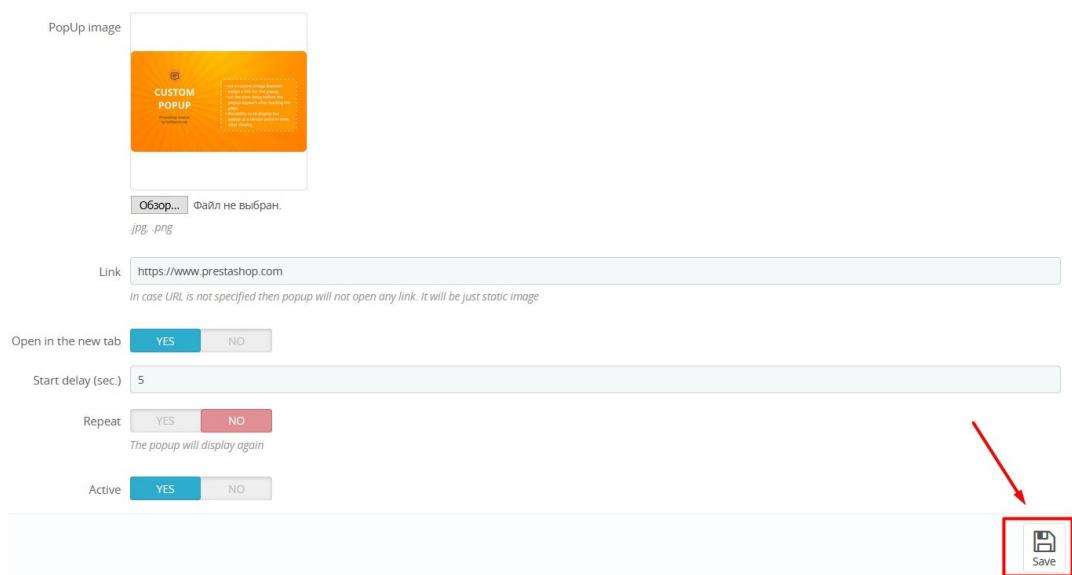

Open in the new tab YES NO

Start delay (sec.) 5

Repeat YES NO
The popup will display again

Active NO

Be sure to save the settings using the "Save" button!

Important!

- images for **PopUp image** can be uploaded in the following formats: .jpg, .png;
- if no URL is specified in the **Link** field, no link will be opened when clicking on popup. Popup will be a static image;
- if you do not select "**YES**" in the **Active** field, the popup will not be displayed;
- if a user clicks on the popup and follows the link, the popup will not appear on that user's site anymore;
- **REPEAT** - here can be set the popup reappearance function on the page in case the user closes the popup with the help of "X" button. Popup will stop to appear if user clicked on the popup image and followed the appropriate link.

Distribute your store products on WordPress sites

Tool

Distribute your store products on WordPress sites! By easily adding products to WordPress, you can achieve higher sales, inventory expansion & customer experience. WP visitors will “add to cart” with the final proceeding of the order in PrestaShop.

Opportunities

Module allows a PrestaShop store owner to copy - paste products with appropriate categories and reflect them on any WordPress site in just by inserting simple code to the page or post body!

Admin opportunities

- Admin can generate the appropriate styles code snippet in PrestaShop module settings and copy-paste it to any WordPress post/page.
- Admin will distribute his PrestaShop products among WordPress satellites, which will boost his sales.
- This instrument could cool solution for dropshipping!

Features

- Admin can generate the appropriate styles code snippet in PrestaShop module settings and copy-paste it to any WordPress post/page.
- Therefore WordPress visitors will see the same product with prices, categories, descriptions and images as they are in PrestaShop.
- WordPress visitors will be allowed to click on the “Add to Cart” button. Then they will be redirected to PrestaShop cart page or product page (defined by admin).
- Admin can generate different styles of the snippet look, language of the products interface, which will be shown in WordPress

Benefits for customers

Customers will have more options to find the product throughout the web, because Wordpress satellites will spread the same products as the main PrestaShop store has. More offers with goods on the market - more chances to buy them!

Settings

Module configuration page (Script settings)

- Text in popup, which will be shown before the redirect from WordPress to main site (PrestaShop)
- Redirect options to PrestaShop (same tab / new tab / cart page / product page / product card to product page)
- Define currency, which will be shown in WordPress
- Choose categories and appropriate products, which will be shown in WordPress
- Styles settings (show / hide category block, show / hide search block, show / hide breadcrumbs, price font color and hover color, show / hide sale price, rest of visual styles for products and categories)
- Language of the products interface, which will be shown in WordPress
- Currency, which will be shown in WordPress
- Categories and appropriate products, which will be shown in WordPress

Spell checker using Grammarly API

Tool

Improves the quality of text content on a store by checking it for grammatical and spelling errors. By using this module, users can get suggestions for corrections and improvements to their writing, which can help to enhance the readability and professionalism of their Prestashop. Additionally, since search engines tend to favor well-written content, using Grammarly can also potentially improve a website's search engine optimization (SEO)

Benefits for Merchants

- **Improving the quality of content:** the module helps merchants to create high-quality and error-free content. This can be especially useful for writing product descriptions, promotional content, and other types of text that are important for attracting customers and conveying information.
- **Saving time:** by using Grammarly module, merchants can save time by catching errors and improving their writing more quickly. This can be especially helpful for merchants who have a lot of content to write and want to be efficient with their time.
- **Enhancing professionalism:** error-free and high-quality writing can enhance the overall professionalism of a merchant's brand. This can help to build trust with customers and increase the perceived value of a merchant's products and services.
- **Ease of use:** The module integrates with Prestashop's back office, making it easy for merchants to access and use Grammarly without having to switch between different applications or platforms.

Benefits for customers

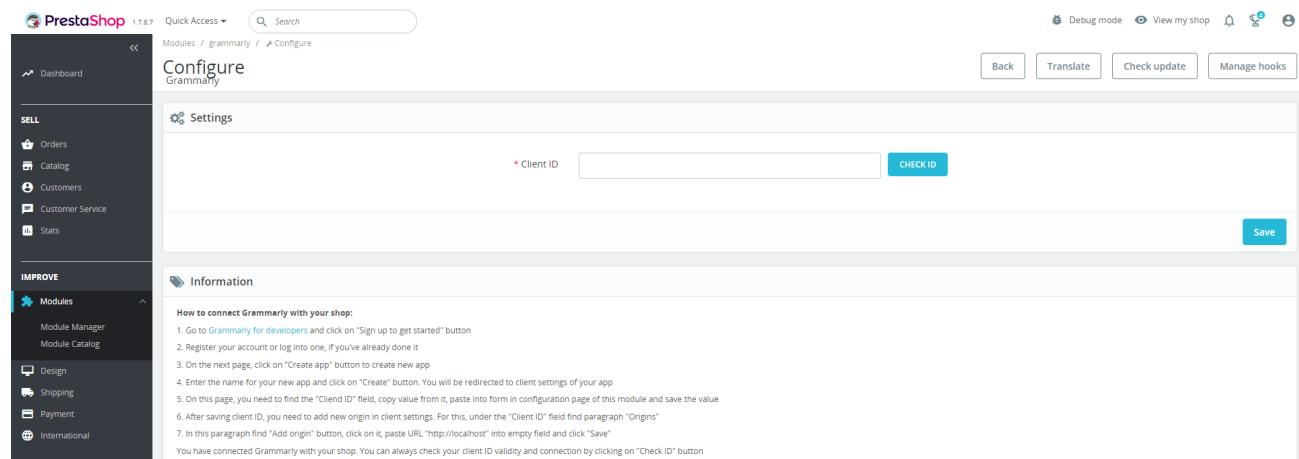

- Customers can more easily understand the features and benefits of the products they are interested in
- Customers may be more likely to trust the website and the products being sold

Features

- Grammar and spelling checks
- Writing style analysis
- Plagiarism checker
- Vocabulary enhancement
- Sentence structure analysis
- Tone detection

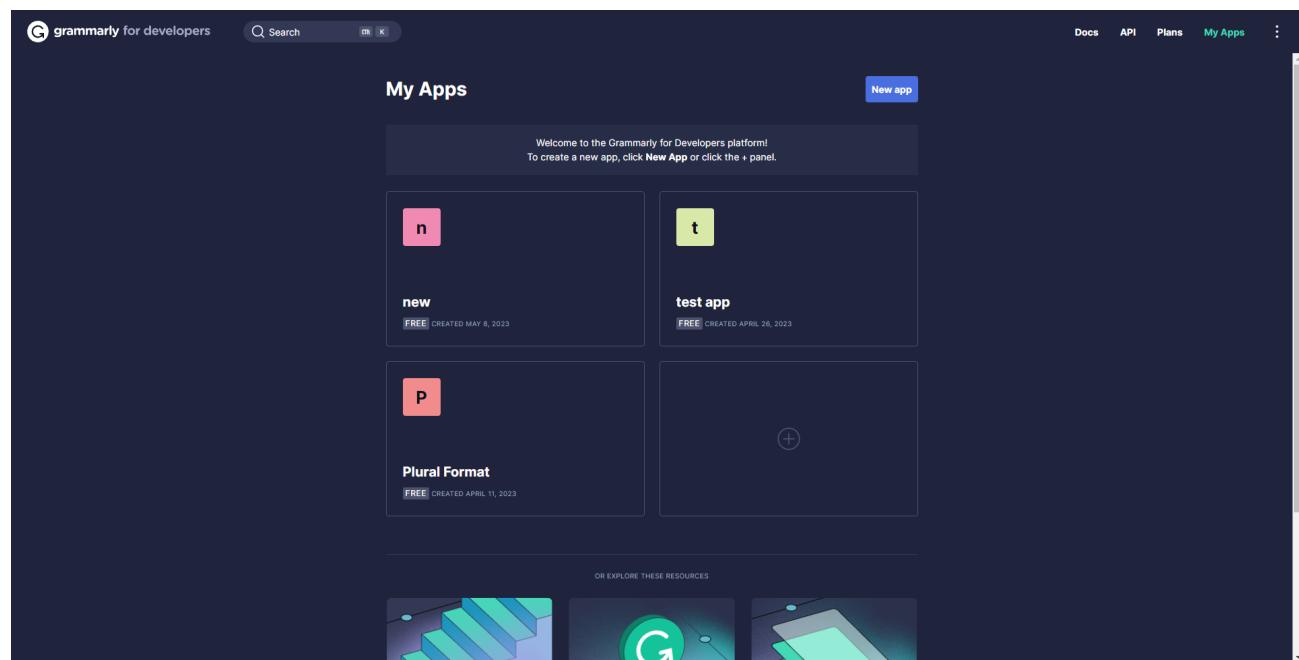

Module settings

Account connection

The screenshot shows the 'Configure Grammarly' page in the PrestaShop back office. The left sidebar shows the 'Modules' section under 'IMPROVE'. The main content area has a 'Settings' section with a 'Client ID' input field and a 'CHECK ID' button. Below this is an 'Information' section with a detailed guide on how to connect Grammarly with your shop, including steps 1 through 7 and a note about adding an origin.

In order to start working with the module, you need to link it to your personal app and account registered on Grammarly. For this, you need to visit a “Grammarly for developers” website:
<https://developer.grammarly.com>

The screenshot shows the 'My Apps' section of the Grammarly for Developers platform. It displays three apps: 'new' (created May 8, 2023), 'test app' (created April 26, 2023), and 'Plural Format' (created April 11, 2023). A 'New app' button is visible in the top right corner.

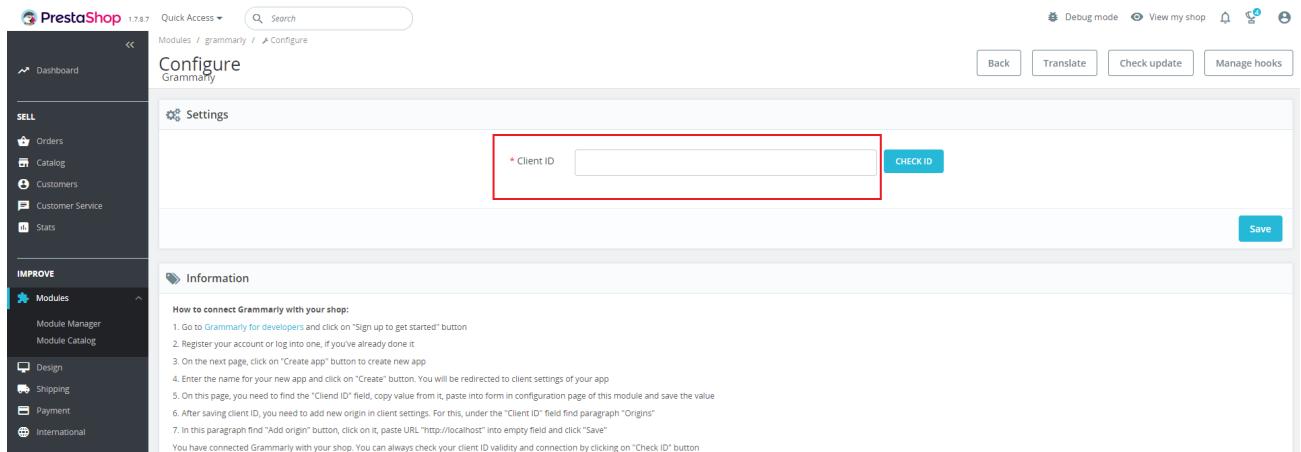

You need to create new app or select the one you, if you have already done that.

The screenshot shows the Grammarly for Developers App Console. On the left, there's a sidebar with 'APP CONSOLE' and a 'test app' section. Below it are 'Dashboard', 'Collaborators', 'Connected Accounts', 'Manage Plan', 'Trusted Authentication', and 'Settings'. Under 'CLIENTS', there are 'Web' and 'Add client' options, with 'Web' selected and highlighted by a red box. The main content area is the 'Dashboard'. It has a 'Monitoring' section with a chart titled 'New writing sessions' showing data from 10:00 to 14:00 on Tuesday, May 8. It also has an 'Analytics' section with 'Unique users' data for April 9 and May 8, and a 'User ratings' section showing a 5-star rating with 'No feedback yet'.

After selecting the desired app, go to “Clients” tab and select clients you need.

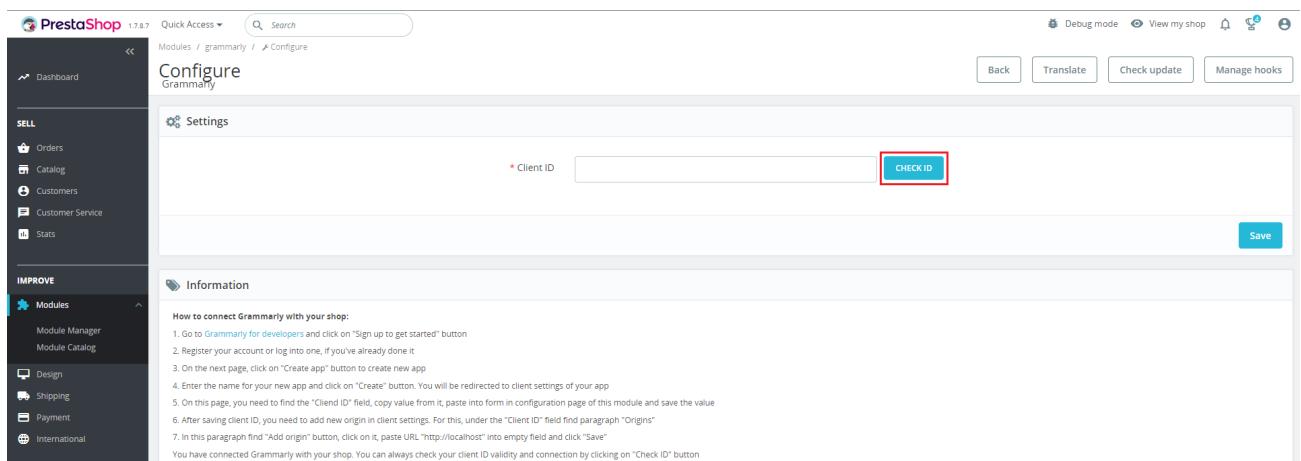

The screenshot shows the 'Clients' tab in the Grammarly for Developers App Console. The 'Web' client is selected. The 'Credentials' section shows 'Client name' (Web) and 'Client type' (Web). The 'Client ID' field is highlighted by a red box. The 'Origins' section is also highlighted with a red box. It contains a note about defining approved origins and a list of rules for including wildcards and specifying ports. There are four input fields for origins and a 'Add an origin' button.

On this tab, you need to find paragraph “Credentials”. In “Origins” section you need to add your domain as a new origin by clicking on “Add an origin button”, entering your domain and clicking on “Save” button. After that, copy value of client ID, paste it into form on configuration page of this module and submit form.

The screenshot shows the 'Configure Grammarly' page in the PrestaShop back office. The 'Client ID' input field is highlighted with a red box, and the 'CHECK ID' button is to its right. The 'Save' button is at the bottom right of the page.

You have connected your Grammarly app with module. You can always check your client ID validity and connection by clicking on “Check ID” button.

The screenshot shows the 'Configure Grammarly' page in the PrestaShop back office. The 'Client ID' input field is highlighted with a red box, and the 'CHECK ID' button is to its right. The 'Save' button is at the bottom right of the page.

Grammarly usage

After connecting your Grammarly app with module, you can use Grammarly features on almost any page in back office, such as product, category or CMS-page edition.

Shipments and returns
Your pack shipment
Packages are generally dispatched within 2 days after receipt of payment and are shipped via UPS with tracking and drop-off without signature. If you prefer delivery by UPS Extra with **required** signature, an additional cost will be applied, so please contact us before choosing this method. Whichever shipment choice you make, we will ensure your package is delivered safely.

Shipping fees include handling a fee for each package. We advise you to use a tracking service to follow the progress of your shipment. Your package will be delivered within 3-5 working days.

Boxes are amply sized and your package will be delivered in a secure box.

Social login via Facebook API

Tool

Allows you to login and authorise in PrestaShop using Facebook account. Besides you can connect your Facebook account to the existing account in PrestaShop.

Benefits for Merchants

- simplifies users' registration on your site;
- increases the conversion of registrations on the site;
- popularize and promote your store in Facebook due to the ease of authorisation;
- users' base growth due to the simplicity of registration;
- higher conversion of orders due to the fast creation of the account on the site via Facebook.

Benefits for customers

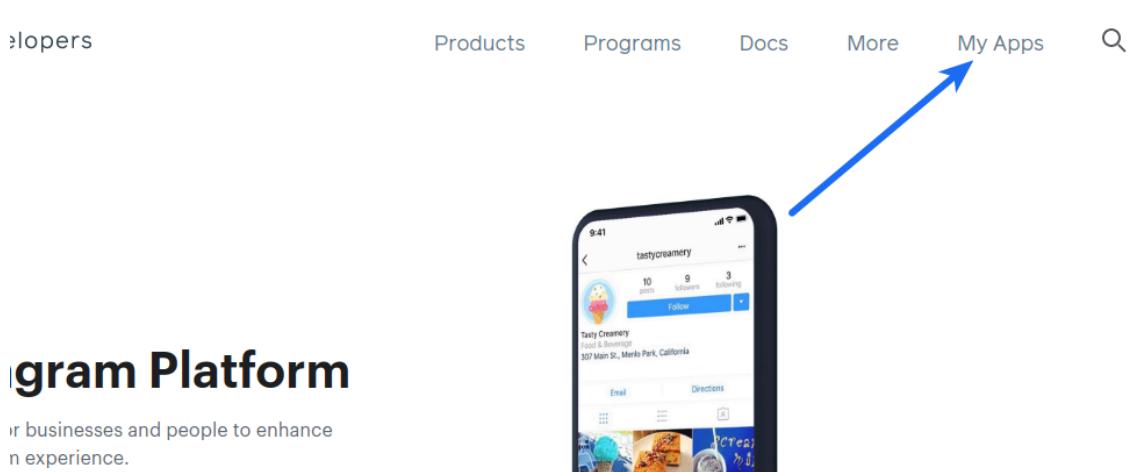

- no need to enter personal data and passwords;
- fast orders proceeding – no need to spend time for the new account creation;
- no necessity to remember login and password to the store account – Facebook authentication is as easy as possible and secure;
- registration and authorization are done in two clicks.

Features

- opportunity to create the new store account based on Facebook authentication;
- user can edit profile anytime (add the email there and rest of details);
- it's possible to connect Facebook authentication to any existing store account;
- user can unlink his Facebook from the store account.

Setup Facebook App by PrestaShop store admin

1. Navigate to <https://developers.facebook.com>, login to your Facebook account if you are not already logged in. Click **My Apps** in the top-right corner.

Facebook Login

5. Click **Set Up** in the **Facebook Login** block

The screenshot shows the 'Add products to your app' section of the Facebook App Dashboard. It lists several products: App Events, Audience Network, Facebook Login, Instagram Basic Display, Webhooks, and Fundraisers. Each product has a 'Read Docs' button and a 'Set up' button. The 'Facebook Login' product is specifically highlighted with a red arrow pointing to its 'Set up' button.

6. Click **WWW** button:

The screenshot shows the 'Facebook Login' section of the Facebook App Dashboard. Under 'Facebook Login', there are 'Settings' and 'Quickstart' buttons. The 'Quickstart' button is highlighted with a red arrow. On the right, there are four platform options: iOS, Android, Web, and Other. The 'Web' option is highlighted with a red arrow.

7. Insert **Site URL** of your site , then press **Save** and **Continue**:

The screenshot shows the 'Web' Quickstart step of the Facebook App Dashboard. It has three steps: 1. Tell Us about Your Website, 2. Set Up the Facebook SDK for Javascript, and 3. Check Login Status. Step 1 has a 'Site URL' input field containing 'https://yourdomain.com/' with a red arrow pointing to it. Step 1 also has 'Save' and 'Continue' buttons, both of which are highlighted with red arrows.

8. Activate “**Login with the JavaScript SDK**” (switch to **Yes**) in the Facebook Login settings and insert your site domain in the “**Allowed Domains for the JavaScript SDK**” field. Click on the **Save** button:

Valid OAuth Redirect URIs
A manually specified redirect_uri used with Login on the web must exactly match one of the URLs listed here. This list is also used by the JavaScript SDK for in-app browsers that suppress popups. [?]

Copy to clipboard

No Login from Devices
Enables the OAuth client login flow for devices like a smart TV [?]

Yes Login with the JavaScript SDK
Enables Login and signed-in functionality with the JavaScript SDK. [?]

Allowed Domains for the JavaScript SDK
Login and signed-in functionality of the JavaScript SDK will only be available on these domains. [?]

3. When deleting a customer account:

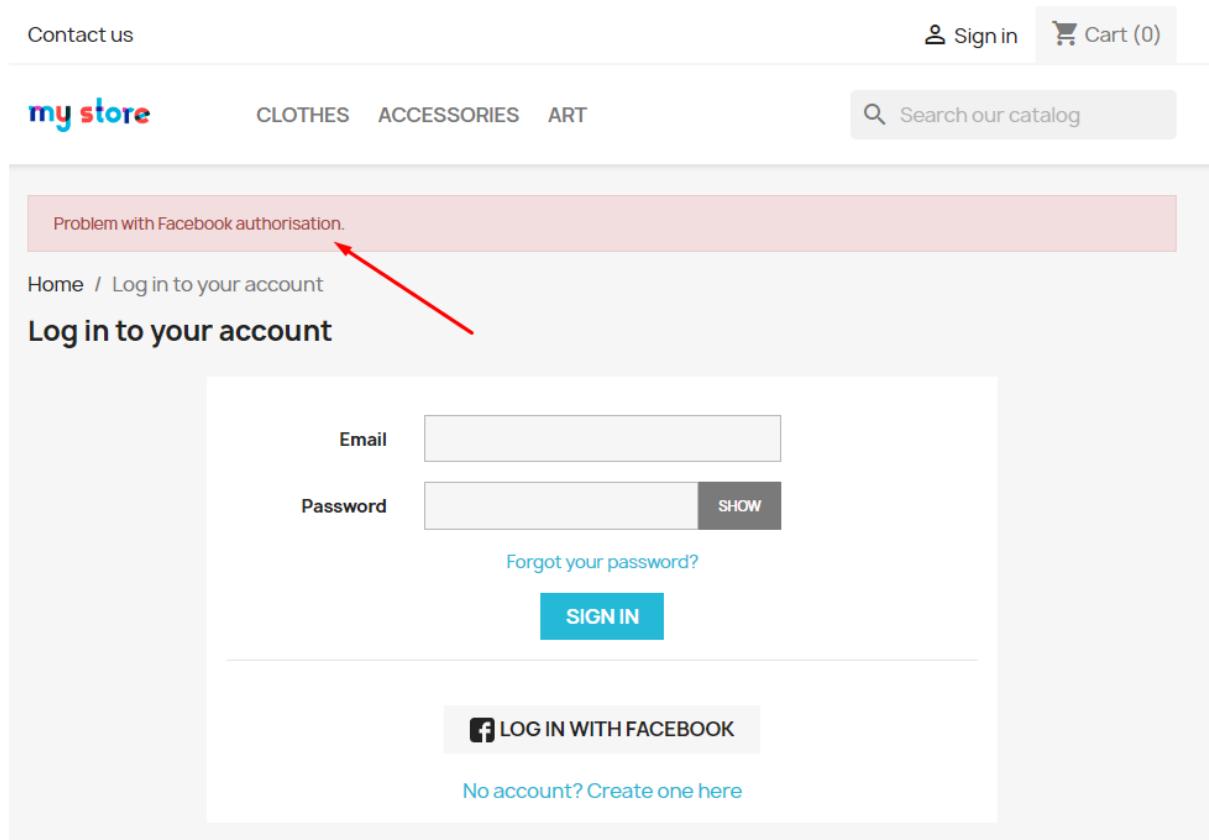

- if a customer's account is deleted from Prestashop store, all links to the customer's Facebook account will be deleted from the database as well.

4. When changing the module settings on the configuration page in the admin panel:

- all user accesses are preserved, when changing "Facebook App ID" and "Facebook App Secret" to other values.

- if the "Facebook App ID" or "Facebook App Secret" is entered incorrectly or the Facebook application is not configured correctly, then an error will be shown to the user when trying to authenticate via Facebook:

Social login via Instagram API

Tool

Allows you to login and authorise in PrestaShop using Instagram account. Besides you can connect your Instagram account to the existing account in PrestaShop.

Benefits for Merchants

- simplifies users' registration on your site;
- increases the conversion of registrations on the site;
- popularize and promote your store in Instagram due to the ease of authorisation;
- users' base growth due to the simplicity of registration;
- higher conversion of orders due to the fast creation of the account on the site via Instagram.

Benefits for customers

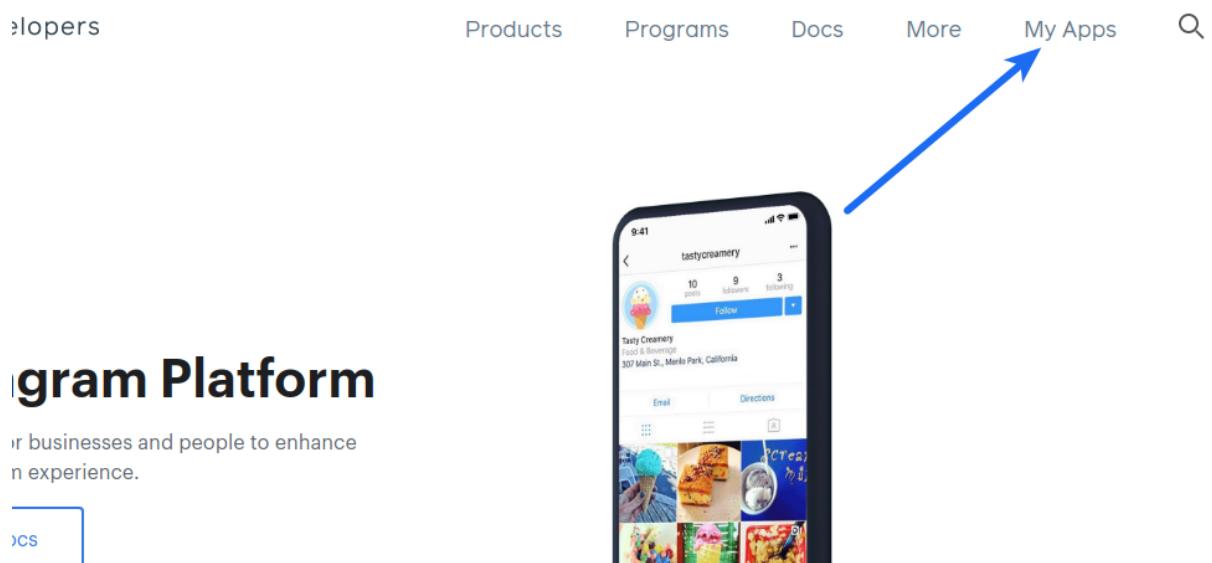

- no need to enter personal data and passwords;
- fast orders proceeding – no need to spend time for the new account creation;
- no necessity to remember login and password to the store account – Instagram authentication is as easy as possible and secure;
- registration and authorization are done in two clicks.

Features

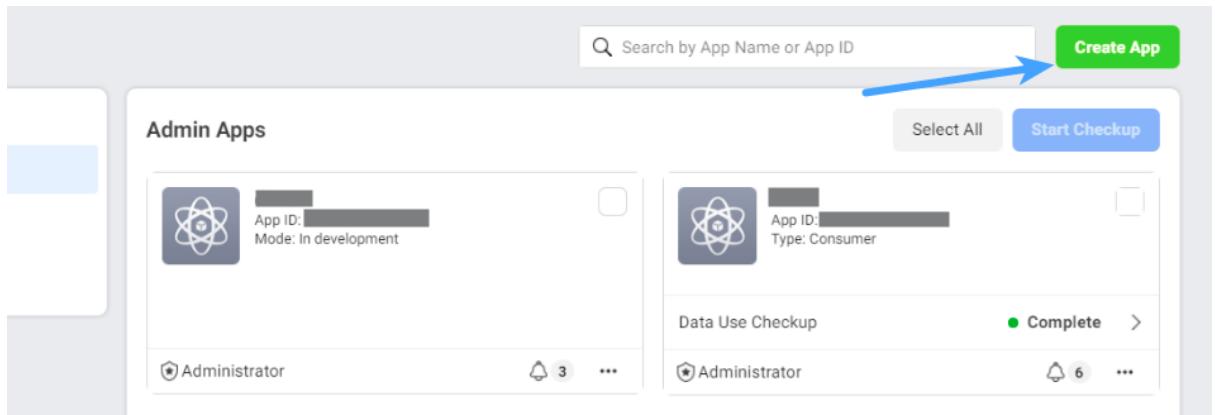

- opportunity to create the new store account based on Instagram authentication;
- user can edit profile anytime (add the email there and rest of details);
- it's possible to connect Instagram authentication to any existing store account;
- user can unlink his Instagram from the store account.

Setup Instagram App by PrestaShop store admin

11. Navigate to <https://developers.facebook.com/products/instagram/>, login to your Facebook account if you are not already logged in. Click **My Apps** in the top-right corner.

The image shows a screenshot of the Facebook Developers website. At the top, there is a navigation bar with links for 'Developers', 'Products', 'Programs', 'Docs', 'More', and 'My Apps'. A blue arrow points to the 'My Apps' link. Below the navigation, there is a search bar and a section titled 'Instagram Platform'. Under 'Instagram Platform', there is a sub-section titled 'Instagram Business API'. The main content area shows a smartphone displaying an Instagram profile for 'tastycreamery' with 10 posts, 9 followers, and 3 following. The profile picture is of an ice cream cone.

29. Login to the Instagram account you invited in the previous step in another browser tab, click the Instagram name above the profile picture. Click on settings icon, click on **Apps and websites**. In the **Tester Invitations** section, accept the invitation you've sent before. You will be able to use this Instagram account only until you get the permissions approved for your Instagram app (see step 23 below).

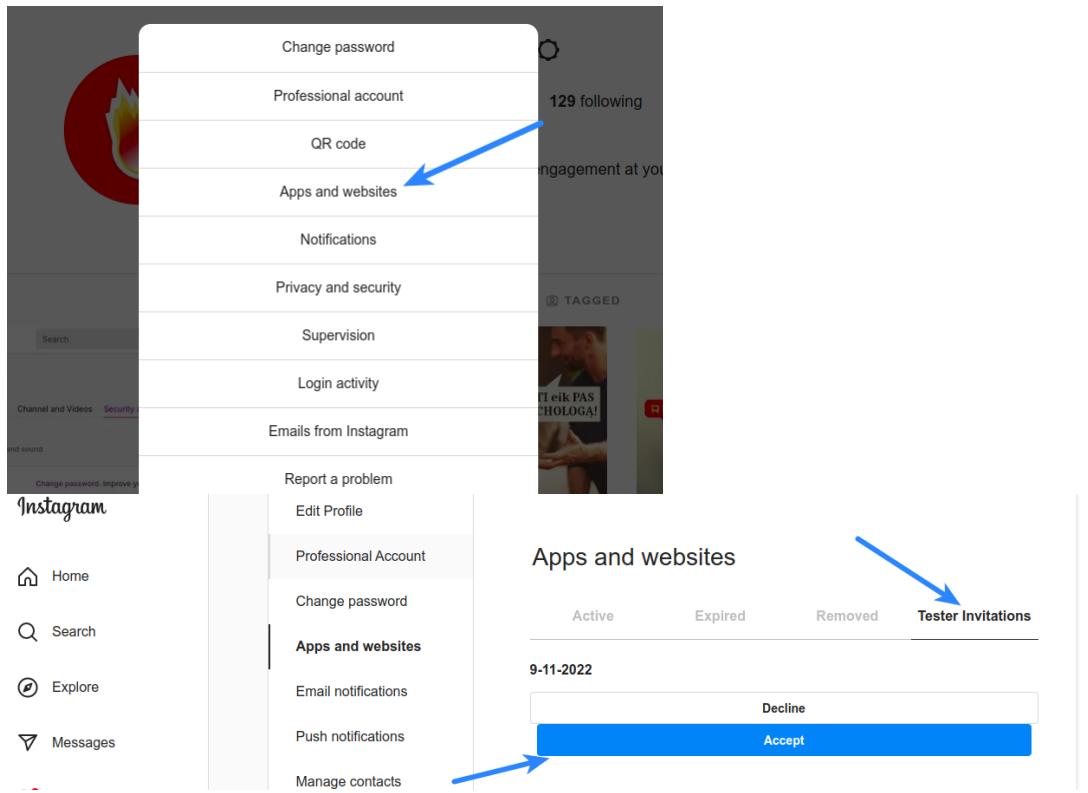

Instagram

Search

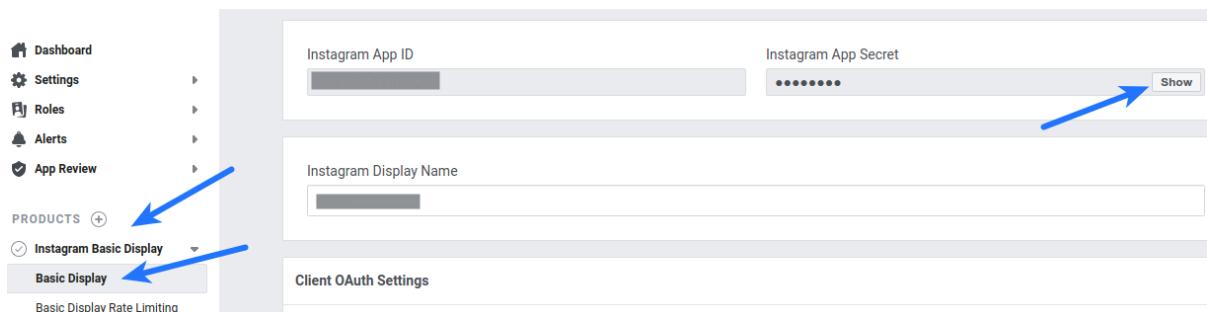

Edit Profile

posts followers following

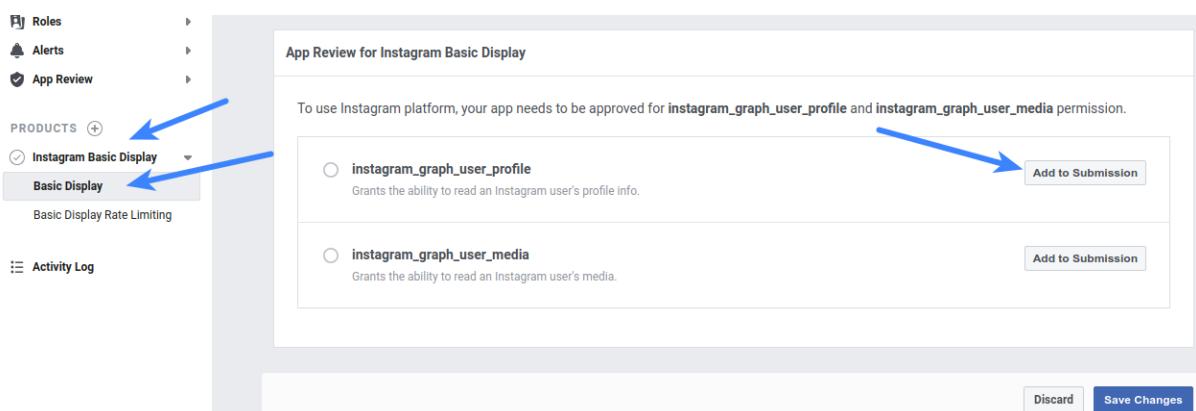

bio

30. Navigate back to the browser tab where you were configuring Instagram app. Navigate to the **Basic Display** page in the **Instagram Basic Display** section from the left sidebar. Copy the **Instagram App ID** and **Instagram App Secret** (after clicking on the **Show** button right in front of it) and paste it in the **Instagram App ID** and **Instagram App Secret** options at the module configuration page in admin area.

31. Scroll down to the **App Review for Instagram Basic Display** section at the bottom of the page and click on **Add to submission** right in front of the `instagram_graph_user_profile`

32. Click **Edit details** in front of **instagram_graph_user_profile** in the **Current submission** section

33. In the option **Tell us how you're using this permission or feature**, you can specify exactly the following:
This app integrates the Instagram icon at the user-profile page of our website which allows end-user to connect their Instagram profile with their pre-existing user-account.
Note: As Instagram does not allow login/authentication to be used with any of their scopes according to their developer docs, you can describe the mechanism your website uses Instagram icon in Social Account Linking section at the user profile page to allow your users to link their Instagram accounts to their existing accounts at your website. Just keep social login icons disabled at the login, register pages of your website before Instagram approves your submission.

Upload a screenshot showing the same, agree to the data usage policy and **save changes**.

Tell us how you're using this permission or feature

The `instagram_graph_user_profile` permission allows your to read the app user's profile. The allowed usage for this permission is to read fields in an Instagram user profile, for example user ID and account type. You can use this permission to read the User node, which represents the Instagram user, and the node's edges. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified).

Please provide a detailed description of how your app uses the permission or feature requested, how it adds value for a person using your app, and why it's necessary for app functionality.

Upload screencast

Provide a detailed step-by-step video walkthrough of how your app will use this permission so we can confirm it is used correctly and it does not violate our policies. [Learn more about screencasts](#)

Screencast requirements:

1. Clearly demonstrate how your app uses the permissions or features you're requesting
2. Show how a consumer will log into your app, as well as the media (videos and pictures) displayed after they log in.

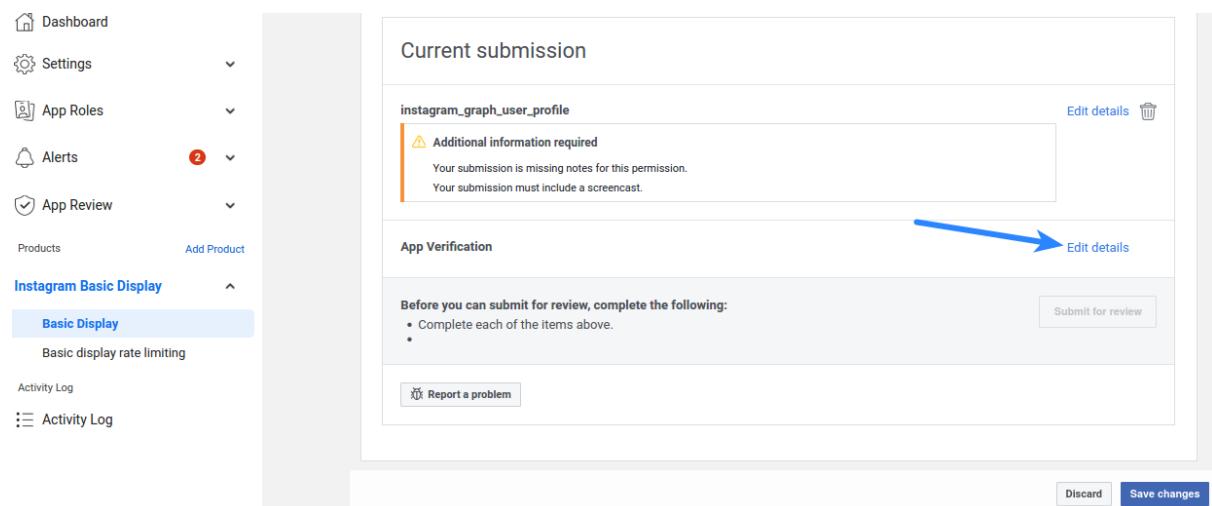

Drag and drop your file

Need help with screencasts? See examples and instructions [here](#)

If approved, I agree that any data I receive through `instagram_graph_user_profile` will be used in accordance with the allowed usage.

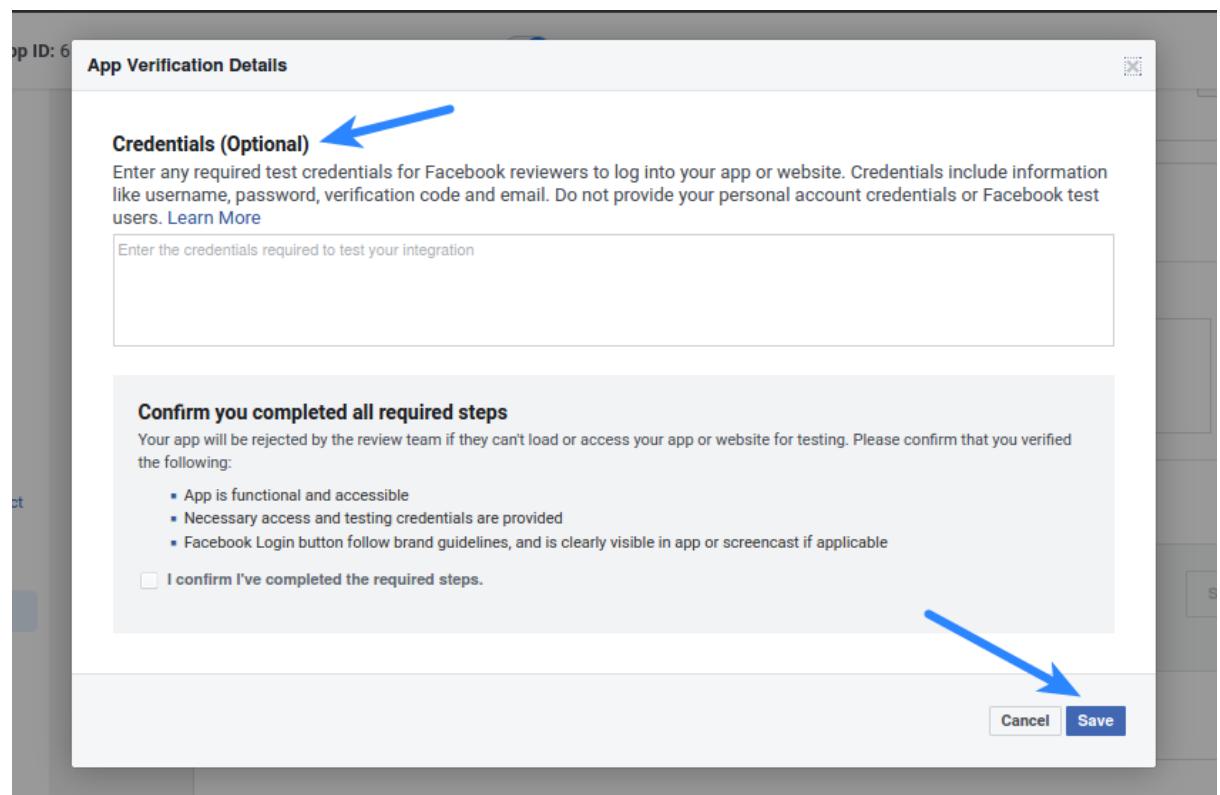

Cancel **Save**

34. Click **Edit details** in front of the **App verification**

The screenshot shows the Facebook App Review dashboard. On the left, there's a sidebar with options like Dashboard, Settings, App Roles, Alerts (with a red '2' notification), App Review, Products, and Add Product. Under App Review, 'Instagram Basic Display' is selected, and 'Basic Display' is currently active. The main area is titled 'Current submission' and shows a section for 'instagram_graph_user_profile'. A yellow warning box says 'Additional information required' with the message 'Your submission is missing notes for this permission. Your submission must include a screencast.' To the right of this box is a blue 'Edit details' button. Below this is the 'App Verification' section, which contains a list of items to complete before submission. At the bottom right of the main area are 'Discard' and 'Save changes' buttons.

35. Here you can specify such details as – Login page of your website where the reviewers can login and see the Instagram icon at the profile page, username-password of the user-account you have created for them at your website etc.

The screenshot shows the 'App Verification Details' dialog box. At the top, it says 'App ID: 6' and 'App Verification Details'. The 'Credentials (Optional)' section is highlighted with a blue arrow. It contains a text input field for entering credentials. Below this is a 'Confirm you completed all required steps' section with a list of requirements and a checkbox for confirming completion. A blue arrow points to the 'Save' button at the bottom right of the dialog.

Setting the CSS styles for the button:

2. The style file is here:

/modules/instagramauth/views/css/instauthfront.css

The screenshot shows a login form with fields for Email and Password, a 'SIGN IN' button, and a 'Forgot your password?' link. Below the form is a button labeled '@LOG IN WITH INSTAGRAM' with a red arrow pointing to it. At the top, there are navigation links for Contact us, Sign in, and Cart (0). The page has a header with 'my store' and categories for CLOTHES, ACCESSORIES, and ART. A search bar is also present.

The screenshot shows a code editor with the file 'instauthfront.css' open. The CSS code defines styles for various elements including registration forms, titles, and an Instagram login button. To the right of the code editor is a 'Project' sidebar showing the project structure. Red arrows point from the code editor to the 'modules/instagramauth/views/css' folder in the project tree, indicating the location of the CSS file.

```

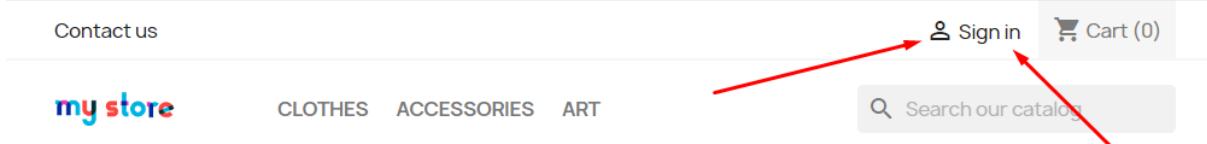

1 #instauth-registration {
2     border: 1px solid #dbe6e9;
3     border-radius: 5px;
4     text-align: center;
5     margin-bottom: 43px;
6 }
7 #instauth-registration .instauth-title {
8     background-color: #fafbfc;
9     border: none;
10    border-bottom: 1px solid #dbe6e9;
11    padding: 10px 0;
12 }
13 #instauth-registration .instauth-title>h3 {
14     margin: 0;
15 }
16 #instauth-registration .instauth-button-conteiner {
17     padding: 20px 0;
18 }
19 #instauth-identity .instauth-button {
20     width: 100%;
21     white-space: normal;
22 }
23 .instauth-button-icon {
24     vertical-align: middle;
25     fill: #232323;
26     width: 20px;
27     height: 20px;
28 }
29 #instauth-login {
30     text-align: center;
31     padding-top: 20px;
32     padding-bottom: 20px;
33 }
34 .instauth-button {
35 }
36

```

Workflow cases:

1. When the user is not logged in and clicks on the "Log in with Instagram" button for the first time on the Login page or on the Registration page:

- after clicking on the "Log in with Instagram" button, the user is redirected to the Instagram page where he needs to confirm his consent to sending his data. After confirmation, he will be redirected to his user account on your website.

You may unsubscribe at any moment. For that purpose, please find our contact info in the legal notice.

4. When the user unlinked his Instagram account:

- if the user logs in again using Instagram, the connection of Instagram to the existing customer account will be restored.
- if the user created a new customer account using the standard method and linked his Instagram account to it, the previous customer's account will be deleted in case there was not indicated email in it. In case the previous account has an email, it will remain active in PrestaShop, so there will be 2 accounts in total: previous without Instagram connection and the new one with the Instagram connection.

5. When deleting a customer account:

- in case the customer's account is deleted from Prestashop, the connection to Instagram account of this customer will be deleted from the database.

6. When changing the module settings on the configuration page in the admin panel:

- if **Instagram App ID** or **Instagram App Secret** is changed to other values, all bindings of customers' accounts to Instagram that were made earlier will be lost.
- if **Instagram App ID** or **Instagram App Secret** is entered incorrectly or the Instagram application is not configured properly, then when trying to authenticate through Instagram, the user will be redirected to the Instagram page where he will see an error:

Screenshot of the PrestaShop 8.0.1 back office configuration page for the Instagramauth module.

The left sidebar shows the navigation menu with the following categories and sub-items:

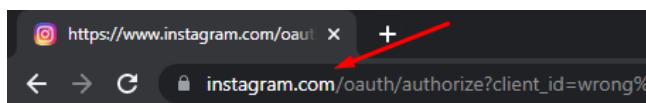

- SELL: Orders, Catalog, Customers, Customer Service, Stats
- IMPROVE: Modules, Design, Shipping, Payment, International
- CONFIGURE: Shop Parameters, Advanced Parameters

The main content area is titled "Configure Instagram authentication" and displays the "Instagram APP Basic Display Settings". It contains two input fields with validation errors:

- * Instagram App ID: "wrong id" (highlighted with a red arrow)
- * Instagram App Secret: "wrong secret" (highlighted with a red arrow)

Below the settings, there are sections for "Valid OAuth Redirect URLs" and "Deauthorize callback URL", each with a corresponding URL.

At the bottom right is a "Save" button.

```
{"error_type": "OAuthException", "code": 400, "error_message": "You must include a valid client_id, response_type, and redirect_uri parameters"}
```

Passwordless login with Google Passkeys

Tool

Passkeys by Google are a safer and easier alternative to passwords. **Users** and **Admins** can log in with a **biometric sensor** (such as a fingerprint or facial recognition), **PIN**, or pattern, freeing them from having to remember and manage passwords.

Benefits for Merchants

- **Passkeys by Google security and reliability**
- You do **NOT** need any Google accounts
- **Biometric** sensor (such as a **fingerprint** and **facial** recognition) or **PIN code login** without entering a password every time
- Works for Android, iOS, Windows and any other devices with a Biometric sensor or PIN
- Most modern devices (smartphones, tablets and laptops) support
- Increased **site usability** - simplified authorization allows your **customers** to **log in quickly and easily**
- Eliminates the problem that your customers forget their login or password - they will be able to log in using the device authorization method
- **Admin and store managers** can also easily log in to the admin panel

Benefits for customers

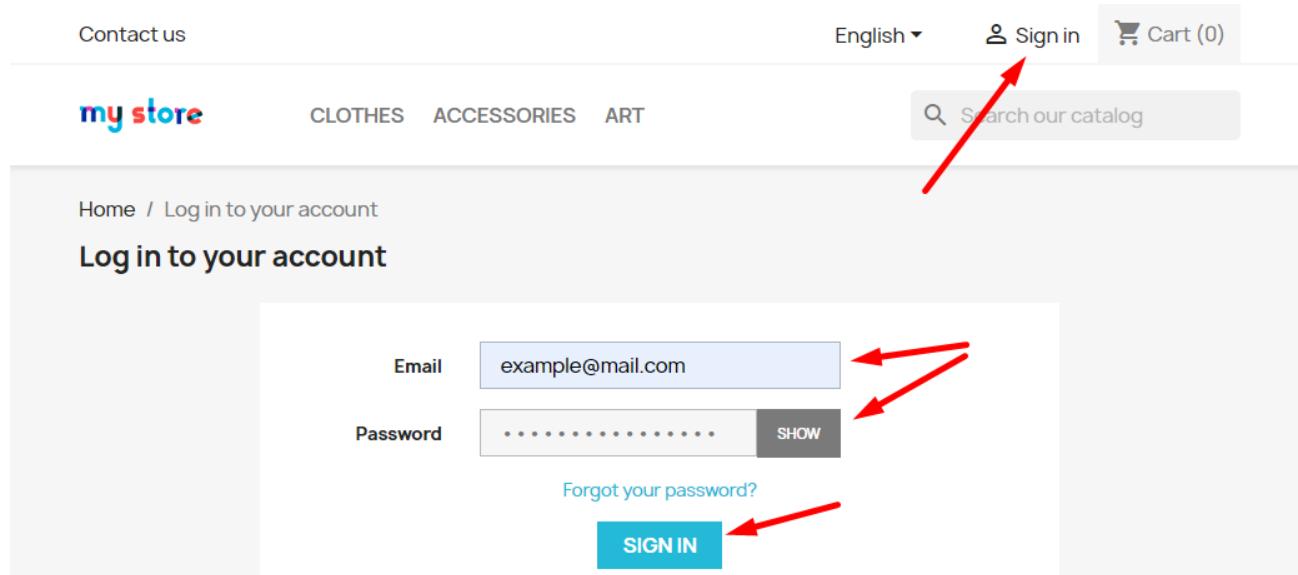

- Eliminates one of the biggest problems for users – using a login and password every time
- Users should not remember their login and password anymore
- Makes the account authorization quick and easy

Features

- Creating a Google Passkey for login both for admin and customers
- Authorization using Google Passkey
- **Biometric** sensor (such as a **fingerprint** and **facial** recognition) or **PIN code login**
- Authorization using a Passkey on the backend for admins and managers

1. Creating a Paykey by user (customer)

The first step is to create a new account or log in to an existing one by entering a login and password:

Home / Create an account 

Create an account

Already have an account? [Log in instead!](#)

Social title Mr. Mrs.

First name
Only letters and the dot (.) character, followed by a space, are allowed.

Last name
Only letters and the dot (.) character, followed by a space, are allowed.

Use the authorization method configured on your device:

The screenshot shows a login page for 'my store'. At the top, there are links for 'Contact us', 'English', 'Sign in', and a 'Cart (0)' button. Below that is a navigation bar with 'my store', 'CLOTHES', 'ACCESSORIES', and 'ART' categories, along with a search bar. The main content area shows a 'Log in to your account' link and a 'Windows Security' dialog box. The dialog has a title 'Making sure it's you', a message 'Please sign in as example@mail.com', and a note 'This request comes from Chrome, published by Google LLC.' It features a PIN entry field with a red arrow pointing to it, a 'Cancel' button, and a 'I forgot my PIN' link. In the background, there is a sidebar with a 'Get our latest news and special sales' section, a 'Your email address' input field, a 'SUBSCRIBE' button, and a note about unsubscribe.

Wait for the operation to complete and you will be successfully authorized and redirected to the target page!

MAC OS example:

Ping services

Tool

Improves indexing of your shop by notifying popular ping services about the new products and pages in your store. Speeds up store indexing and improves SEO.

Benefits for Merchants

- ping services speed up site indexing and promote it higher in search results;
- new pages and products will get traffic higher;
- no need to use manual submissions in each individual ping service – module sends bulk pings;
- store gets automatic fast backlinks indexing by search engine bots.

Benefits for customers

- customers can find shop content more often in search results;
- customers can find shop and its products easier due to faster indexing by search engines;
- backlinks from ping services will provide extra promotion of the store pages and products.

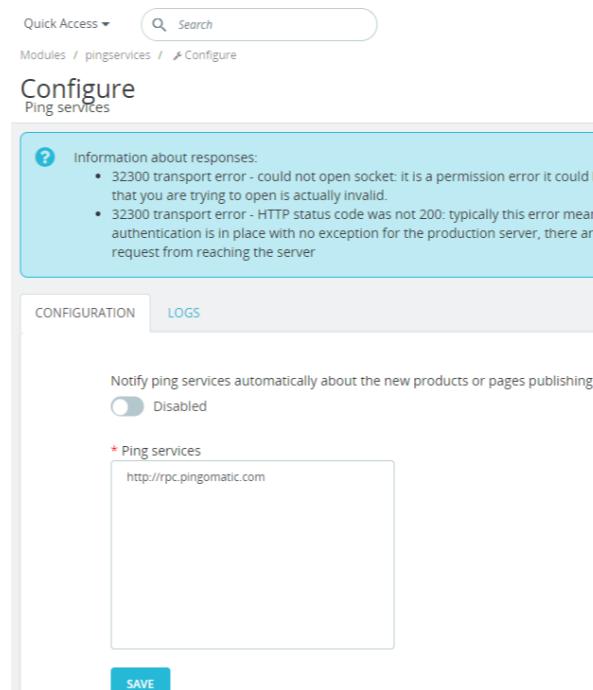

Features

- admin can use any ping services he wants by adding their list in module settings;
- admin can notify ping services by selecting necessary products or categories using checkboxes or directly from the product or category page while editing it;
- module sends pings automatically after admin adds content.

Module settings

1. “Configuration” tab

Adding new ping services:
